## 2004 Kentucky Annual Long-Term Care Report

### INTRODUCTION

The Health Policy Development Branch of the Division of Epidemiology and Health Planning announces the release of the 2004 Kentucky Annual Long-Term Care Report. This branch is responsible for the utilization data collection and reporting required by 902 KAR 20:008 (rev. 2-16-01) and in support of the State Health Plan 902 KAR 17:041.

This report covers the period from January 1, 2004 to December 31, 2004. The files received from the Office of Inspector General (OIG), Division of Licensure and Regulation contained 411 Long Term Care Facilities. Correspondence or surveys were received from all licensed facilities. The number of facilities has decreased from 414 Long Term Care Facilities in 2003. There have been several facility name changes, reopening of closed facilities, as well as, the number of licensed bed types during 2004.

The 2004 overall occupancy rate for nursing facility beds is 89.35% down from 90.36%(-1.01%) in 2003. This continued the trend that began in 1995, with the exception of 1999, of decreasing annual occupancy in the Nursing Facilities (NF). The highest occupancy rate was 95.00% for the survey year 1995 and the lowest is the 2004 reporting year. The total net change from 1995 to 2004 was -5.65%.

The ending census or the number of NF beds occupied December 31, 2004, was 23,671 compared to 22,926 occupied beds on December 31, 2003. These beds provided 8,573,076 patient days of care in 2004 compared to 8,489,498 in 2003.

While NF Beds occupancy rate for 2004 was down by 1.01% and the total patient days for NF increased by 83,578. A problem occurred in 2003 when some Nursing Facilities reported as Skilled Nursing and more days reported because of the leap year. The occupancy rate for Personal Care (PC) also decreased by 0.21% and the total patient days decreased by 10,259.

**\*There were 366 days (2004 was a Leap Year) used in calculations for Total Patient Days and Potential Patient Days. These days projects to 26,441 more Potential Bed Days than for the survey year 2003.**

**Payor Source for 2004.** The 2004 Payor Source, Section 2, for total patient days as reported by the NFs shows the following distribution. The total number of reimbursed days for nursing facilities is 8,466,574 days or 64,742 days more than 2003. Medicare paid days increased by 72,204 days from the 2003 report and Medicaid paid days were 120,986 less in 2004 than the previous report year. This is the third year that the number of Medicaid paid days has decreased by a substantial amount.

**\*NOTE:** When checking ending census for the previous year and the beginning census for the current year, there may be a discrepancy in the numbers.

The definitions of terms in this report are:

**Long-Term Care:**

A facility licensed by the state through the Division of Licensing and Regulation providing one or more of the following levels of care:

**Nursing Facility (NF)** - Long-term care facilities, formerly skilled nursing, nursing home, or intermediate care facilities prior to October 1, 1990, which meet the Omnibus Budget Reconciliation Act of 1987 (OBRA 87) nursing home reform requirements. Nursing facilities must be certified to participate in the **Medicare program in order to be certified for participation in Medicaid**, with the exception of those who have obtained a Medicaid nursing requirement waiver.

**Skilled Nursing (SN)** - Establishments with medical staffs and permanent facilities that include inpatient beds, and with medical services, including physician services and continuous nursing services; that provide treatment for patients who require inpatient care but are not in an acute phase of illness and who currently require primarily convalescent or restorative services, and who have a variety of medical conditions.

**Nursing Home (NH)** - Establishments with permanent facilities that include inpatient beds, and with medical services including continuous nursing service; that provide treatment for patients who require inpatient care but do not currently require continuous hospital services.

**Intermediate Care (IC)** - Establishments with permanent facilities and health related services for patients who do not require the degree of care and treatment which a hospital or skilled nursing facility is designed to provide, but who, because of their mental or physical condition, require care and services (above the level of room and board) which can be made available to them only through institutional facilities on an inpatient basis.

**Alzheimer's Facility (ALZ)** - A long-term care facility constructed and operated pursuant to KRS.216B.071 that provides care to residents with a primary diagnosis of Alzheimer's disease or related disorders.

**Intermediate Care Facility for the Mentally Retarded (ICF/MR)** - A facility licensed by the state through the Division of Licensing and Regulation to provide care for the mentally retarded and developmentally disabled.

**Total Patient Days:**

The total days of patient care provided by the facility for the year based on its capacity. It is calculated by summing the daily patient census for each day in the reporting period.

**Days in Period:**

2004 had 366 days.

**Licensed Beds:** The number and type of beds for which the facility has been licensed at the end of the reporting period.

**Percent Occupancy:**

Total days divided by potential patient days.

**Potential Patient Days:**

Number of licensed beds x the number of days in the reporting period (adjusted to reflect changes in licensed beds during the reporting period. Example: 100 licensed beds X 366 (days in 2004) equals 36,600 potential days.

This figure is not shown in the report but used to calculate occupancy percentages.

**Reporting Period:**

January 1, 2004 to December 31, 2004

**Nursing Facility Special Note:** If a facility converted Skilled Nursing (SN), Nursing Home (NH), or Intermediate Care (IC) beds to NF beds during this reporting period, all resident activity in these beds was considered to be NF for the entire period regardless of the date of the change.

This report now becomes the most recent official data on Long Term Care services utilization published by the Cabinet for Health Services. ## Data Analysis - Occupancy Rates

The following table and graphs present statistics from the Kentucky Annual Long-Term Care Reports from 1995 to 2004. In the published reports for 1996 and 1997, the data was reported in Medicaid Managed Care Partnership Regions (MCPR) rather than in Area Development Districts (ADDs). The survey data were recalculated using the ADDs so that a linear comparison could be made. A map of the ADDs is included at the end of this section.

LTC facilities continue to be an important segment of the continuum of care in Kentucky. Hospital discharge for 2004 shows a total of 353,491 patients age 45 and older was discharged from Kentucky Acute Care hospitals for all DRGs. Of the 202,300 females discharged 29,518 or 0.08% were discharged to a skilled or intermediate care facility. Males discharged to skilled or intermediate care facilities were 10% of total male hospital discharges with 151,188 males discharged from acute care hospitals and 14,657 of these discharges placed in skilled or intermediate care facilities.

The occupancy rate for licensed Nursing Facility beds has decreased over the past ten years by 5.65% from 95% in 1995 to 89.35% in 2004. The following chart shows the decrease in occupancy for the last ten years. The decline has been continuous from 1995 through 1998 with a very small increase in 1999 (0.05%), which is likely not statistically significant. The occupancy rate in following table shows data for each year by ADD. From 1995 to 2003, occupancy fell in ten of the fifteen ADDs. An attached chart shows a graphical interpretation of the data.

The number of licensed Nursing Home (NH) has decreased from 580 beds in 2003 to 428 (0.74%) NH beds in 2004 and patient's days have increased from 165,463 to 127,288 in 2004. The occupancy for NH beds increased from 81.26% in 2003 to 87.77% (6.51%) for 2004. Even though the number of NH beds has decreased the occupancy rate has increased. Some of the increase in occupancy may be due to the leap year effect.

Further data on the occupancy rates by bed type are presented on the following charts and table.
