

A SPECIFIC H3N2 INFLUENZA VIRUS HAS BEEN FOUND IN BOTH PEOPLE & PIGS IN INDIANA, ALTHOUGH THIS FLU VIRUS HAS NOT YET BEEN FOUND IN KENTUCKY.

IT IS RECOMMENDED THAT PERSONS AT HIGH RISK* OF SERIOUS FLU COMPLICATIONS SHOULD **NOT** HAVE CONTACT WITH PIGS OR ENTER AREAS WITH PIGS.

DON'T TOUCH

FOR PROTECTION OF ANIMAL HEALTH, IT IS RECOMMENDED THAT PERSONS EXHIBITING SYMPTOMS OF INFLUENZA **NOT** HAVE EXPOSURE TO PIGS.

IF FLU IS CONTRACTED BY THOSE PEOPLE AT HIGH RISK*, SERIOUS COMPLICATIONS ARE POSSIBLE.

* Those at HIGH RISK include: children younger than 5 years, people 65 years and older, pregnant women, and people with certain chronic medical conditions (like asthma, diabetes, heart disease, weakened immune systems, and neurological or neurodevelopmental conditions).
