

Influenza

The State of Kentucky has reported four confirmed influenza cases. It is recommended that health care providers be vaccinated. For more information, please visit the Department for Public Health website.

Packaging and Shipping

It has finally happened! DOT, IATA, and USPS regulations are now aligned. Some changes are:

Biological Substances, Category B

- Diagnostic Specimen has been changed to Biological Substances, Category B
- The name and phone number of a person who is knowledgeable about the material being shipped must be on the airway bill or the outside of the box for Biological Substance.
- UN3373 must be displayed on the outer package. Biological Substance, Category B is adjacent to UN3373.

Infectious substances (Category A) are no longer mailable through the United States Postal Service!
