<p>F 000</p> <p>F 281 SS=D</p>	<p><b>INITIAL COMMENTS</b></p> <p>An annual recertification survey and an abbreviated survey ( KY #18193) was conducted on 04/18/12 through 04/20/12, and a Life Safety Code survey was conducted on 04/19/12 to determine the facility's compliance with Federal requirements. The facility was not in compliance with Federal regulations with deficiencies cited at the highest S/S of an "H." An extended survey was conducted on 04/20/12. Substandard Quality of Care was identified on 04/20/12 at 42 CFR 483.25 Quality of Care (F323). KY #18193 was substantiated with deficiencies cited.</p> <p><b>483.20(k)(3)(i) SERVICES PROVIDED MEET PROFESSIONAL STANDARDS</b></p> <p>The services provided or arranged by the facility must meet professional standards of quality.</p> <p>This REQUIREMENT is not met as evidenced by: Based on interview, record review, and review of the facility's policy/procedure, it was determined the facility failed to ensure services provided met professional standards of quality related to administration of medications per the physician's order for one resident (#18), in the selected sample of eighteen residents.</p> <p>Findings include: A review of the facility's policy/procedure, "Physician Visits and Medical Orders," effective December 2010, revealed members of the interdisciplinary team were to provide care, services, and treatment according to the most recent medical orders and according to laws,</p>	<p>F 000</p> <p>F 281</p>	<p>Hermitage Care and Rehab Center does not believe and does not admit that any deficiencies existed, before, during or after the survey. The Facility reserves the right to contest the survey findings through informal dispute resolution, formal appeal proceedings or any administrative or legal proceedings. This plan of correction is not meant to establish any standard of care, contract obligation or position and the Facility reserves all rights to raise all possible contentions and defenses in any type of civil or criminal claim, action or proceeding. Nothing contained in this plan of correction should be considered as a waiver of any potentially applicable Peer Review, Quality Assurance or self critical examination privilege which the Facility does not waive and reserves the right to assert in any administrative, civil or criminal claim, action or proceeding. The Facility offers its response, credible allegations or compliance and plan of correction as part of its ongoing efforts to provide quality of care to residents.</p> <ol style="list-style-type: none"> <li>1. Resident #18 that was affected by the alleged deficient practice was discharged from the facility on 4/2/12.</li> <li>2. All other resident's Medication Administration Records Sheet and medications were checked by the Administrative Nurses on 04/23/2012 to ensure no other residents were affected by the alleged deficient practice. Medication Administration Records were audited to ensure pain medications were administered to include control substance. No other deficient practice was identified</li> </ol>

F 281	Continued From page 2 An interview with Licensed Practical Nurse (LPN) #4, on 04/20/12 at 1:10 PM, revealed she passed medications the night of 03/29/12. She revealed there was no Ferrous Sulfate in the emergency kit. She further revealed she should have given the other medication from the emergency kit.  An interview with Registered Nurse (RN) #1, on 04/20/12 at 9:30 AM, revealed she passed medications on the morning of 03/30/12. She revealed some of the resident's medications were not received from pharmacy, so they were "initialed and circled" on the MAR to indicate the resident did not receive them. She revealed she should have gotten the resident's medications from the emergency kit.  An interview with the Pharmacy Director, on 04/20/12 at 3:00 PM, revealed the emergency kit was replaced three times a week.  An interview with the Director of Nursing (DON), on 04/20/12 at 4:15 PM, revealed the staff were expected to use the emergency kit if a resident's medications were not available.	F 281	This will ensure medications are given as ordered. Director of Nursing will audit monthly 10% of new medication orders to ensure resident medications are ordered, available, administered and effective. The Director of Nursing will review monthly the Emergency Drug Kit forms to ensure Emergency Drug Kit is being utilized properly for all medications that are not timely delivered and/or not available for the residents as prescribed. 4. The Nursing Administrative team will report findings to Director of Nursing in the daily clinical meeting to ensure proper follow up. Any deficient practice identified will be reported to the administrator immediately by the Director of Nursing. Further investigation will be completed by the Director of Nursing and Administrator with appropriate action as necessary. Director of Nursing will report findings to the monthly Quality Assurance Committee for 3 months for monitoring and follow up by the quality assurance committee and the Medical Director. 5. Corrective Action Date: 06/01/12		
F 282 SS=H	483.20(k)(3)(ii) SERVICES BY QUALIFIED PERSONS/PER CARE PLAN  The services provided or arranged by the facility must be provided by qualified persons in accordance with each resident's written plan of care. F 282	Continued From page 3 provide care according to the written plan of care for two residents (#1 and #4 ), in the selected sample of 18 residents. The facility failed to provide adequate supervision to Resident #4 as directed on the Comprehensive Care Plan to prevent repeated falls. On 01/27/12, Resident #4 was admitted to the facility with a history of falls at home. The Plans of Care for January, March, and April identified falls on 01/31/12, 03/18/12, 04/16/12, and 04/17/12, with the inlited interventions related to alarms and observations of the resident. On 03/30/12, Resident #4 sustained a hip fracture which required surgical intervention as a result of a fall where the resident was left unattended in his/her room. On 04/08/12, Resident #4 was readmitted to the facility and determined at high risk for falls. Resident #4 suffered additional unobserved falls on 04/16/12 and on 04/17/12 where staff continued to not follow the care leaving the resident unattended while up in the wheelchair in the residents room. The facility failed to implement care plan interventions for Resident #1 to prevent accidents and/or injury for the resident. The facility assessed the resident at high risk for falls and developed care plan interventions to address the risk for falls; however, the facility failed to follow the planned interventions and provide the assistive devices deemed appropriate to prevent accidents and/or injuries to Resident #1. Findings Include:  An interview with the Director of Nursing (DON), on 04/20/12 at 4:00 PM, revealed the facility did not have a policy and procedure that specifically addressed the implementation of the care plan.	F 282	1. Resident #4 that was affected by the alleged deficient practice was placed on 1:1 supervision on 04/20/12 by the Administrator and Director of Nursing. Resident #1 was reassessed by the unit Assistant Director of Nursing for need for alarms and alarms were discontinued on 04/21/12. Pressure bed alarm and the personal alarm were discontinued 04/24/12. 2. Residents who have experienced a fall within the last 30 days had a complete chart review by the licensed nursing administrative team on 4/22/12 to ensure appropriate interventions were in place. On 04/22/12 all residents were reassessed and new fall risk assessments were documented and care plan audits for residents at risk for falls was completed by licenses nursing administrative team. 3. Director of Nursing and Staff Development Coordinator in-serviced licensed nursing staff April 27 <sup>th</sup> , 2012 on root cause analysis, appropriate fall interventions, change of condition, physician/responsible party notification, falling star program, recognizing when to discontinue an ineffective current fall intervention that is not working and/or agitating the resident, care plan updating, incident & accident reporting, obtaining witness statements, survey and/or recreate

F 282	<p>Continued From page 5</p> <p>fall", dated 03/18/12, revealed the facility developed interventions for staff to encourage Resident #4 to be in the lobby for observation and to not be left unattended while up in the wheelchair. A review of the Plan of Care for "head injury from fall", dated 03/18/12, was updated on 03/23/12 and documented their knowledge that the resident refused to leave alarms on, takes them off and hides them; however, maintained these interventions to prevent falls.</p> <p>A review of Physician's Orders, dated 03/29/12, revealed Resident #4 was to have personal (clipped to clothing) and pressure bed alarms on at all times.</p> <p>A review of the "Fall/Change in Functional Status," dated 03/30/12, revealed a CNA found Resident #4 sitting on the floor in his/her room and was unattended. The facility assessed the resident for injuries and found a skin tear on the left elbow and Resident #4 was complaining of hip pain. An interview with CNA #8, on 04/19/12 at 3:00 PM, revealed the fall on 03/30/12 occurred during the supper meal while Resident #4 was alone in his/her room. CNA #8 stated she found the Resident #4 sitting on the floor. Interview with RN #5, on 04/20/12 at 9:10 AM, revealed she was called from the dining room to find that Resident #4 had fallen. RN #5 found the resident sitting in the wheelchair and complaining of hip pain. RN #5 reported the alarms were sounding when Resident #4 fell and staff reported they found him/her sitting in the floor of his/her room alone. The facility did not identify that Resident #4's care plan was not being followed as the resident was left unattended in his/her</p>	F 282	<p>report will be brought to clinical white board meeting and root cause analysis will be identified and added to the incident/accident by licensed nursing administrative team. F 282	<p>Continued From page 9 staff was notified. The resident was unattended.</p> <p>An observation, on 04/20/12 at 4:25 PM, revealed Resident #4 was sitting in his/her wheelchair in the doorway of his/her room in a forward drooped position with his/her eyes closed. The resident did not respond to a verbal greeting. An interview with CMT #3 revealed Resident #4 received Lortab 5/325 mg for pain at 11:00 AM, and received Alivan for anxiety at 12:00 PM. At 4:33 PM, Resident #4 remained in the wheelchair in his/her the doorway of his/her room. His/her posture was more erect at that time. The resident responded to a verbal greeting by lifting his/her head and opening his/her glassy eyes. His/her mouth fell open from a relaxed jaw, but no verbal response was given.</p> <p>The Director of Nursing (DON), on 04/20/12 at 3:10 PM, revealed the facility had staffing to ensure adequate supervision was provided for Resident #4 to keep him/her safe. The DON stated if the nursing staff was busy, she could notify other facility departments, such as activities or the chaplain, to attend to the resident. The DON stated Resident #4 cannot be forced to stay at the nurse's station and the staff cannot keep the resident on one-to-one supervision, as the staff had to take care of other residents. The DON reported the facility ensured the safety of Resident #4 the same way as they do for all residents by moving around the facility and ensuring whereabouts of the residents. Another method of ensuring safety, reported by the DON, was "team tackling" and described this method as part of internal audits and the review of different topics each day. However, the DON was unable to provide evidence that the facility had identified</p>	F 282

F 309	Continued From page 12  This REQUIREMENT is not met as evidenced by: Based on interview, record review, and review of the facility's policy/procedures, it was determined the facility failed to ensure each resident received the necessary care and services to attain the highest practicable physical, mental, and psychosocial well-being, related to the administration of pain medication for one resident (#18), in the selected sample of eighteen residents.  Findings Include:  A review of the facility's policy/procedure, "Pain Management," dated December 2010, revealed unrelieved pain was a stressor that could cause both physical and psychological strain. Without proper management it would actually lead to pathological changes such as complications with immobility and malnutrition. Each resident identified with pain would have an ongoing assessment, a monitoring system, and a specific plan of care to address these issues.  A record review revealed the facility admitted Resident #18 on 03/29/12 with diagnoses to include Left Total Knee Revision, Migraines, Rheumatoid Arthritis, Osteoporosis, and Fibromyalgia. A review of the Nursing Admission Information, dated 03/29/12 at 4:00 PM, revealed the facility assessed the resident as alert and oriented. A review of the Pain Evaluation revealed daily severe incisional pain and moderate joint pain. The instructions on the Pain Evaluation	F 309	were not affected by the alleged deficient practice. Medication Administration Records were audited to ensure pain medications were administered to include control substance. No other deficient practice was identified.  3. Director of Nursing and Staff Development will in-service on 05/11/2012 all licensed nursing staff and Certified Medication Technicians on policy and procedure for medication administration, ordering and reordering medications including narcotics, pain management, use of emergency drug kit and notifying Director of Nursing when medications are unavailable. Pharmacy Consultant to provide in-service on process of securing medications, ordering medications and administration. Licensed Nursing Administrative team will be assigned a specific hall to review weekly for 3 months narcotics and medications to ensure they have been ordered in a timely manner. Director of Nursing will audit monthly 10% of resident's narcotics and medications to ensure they are ordered, available, administered and effective. Nursing Administrative team will report findings to Director of Nursing weekly to ensure proper follow up by the Director of Nursing. Director of Nursing will report weekly audits to the administrator for further follow up and education as needed.

F 323	<p>Continued From page 19</p> <p>A review of the Admission Minimum Data Set (MDS) assessment, dated 02/03/12, revealed the facility assessed Resident #4 as at risk for falls with a history of falls prior to admission to the facility. The resident required extensive assistance for walking in his/her room, but did not walk in the corridors at the time of the MDS evaluation.</p> <p>A review of the Comprehensive Care Plan for falls, dated 02/03/12, revealed interventions included a personal alarm on at all times and a pressure bed alarm on while in the bed. Further review of the Comprehensive Care Plan for falls, dated 02/03/12, and updated on 03/16/12, revealed the intervention for the personal alarm was discontinued.</p> <p>A review of the "Fall/Change in Functional Status," dated 03/18/12 at 6:30 AM, revealed Resident #4 had an unobserved fall which resulted in a hematoma, 7-centimeter (cm) by 4 cm laceration injury to the back of his/her head, and a bruise on the left thumb. The resident stated he/she fell on the floor. A review of the "Incident Accident Tracking Log," dated 03/18/12 at 6:30 AM, revealed Resident #4 attempted to go to the bathroom unassisted and fell, hitting his/her head. An interview with Certified Nurse Aide (CNA) #6, on 04/20/12 at 10:00 AM, revealed Resident #4 did not like to request assistance and frequently went to the bathroom unassisted. The alarm sounded on 03/18/12, but the resident was already up and trying to get to the bathroom by the time staff arrived. An interview with RN #4, on 04/20/12 at 1:45 PM, revealed Resident #4 was moved to a room closer to the nurse's desk</p>	F 323

F 323	<p>Continued From page 20</p> <p>on 03/18/12 to enable the facility staff to closely monitor the resident. The facility initiated an intervention for Resident #4 to be out in the lobby while up due to the resident removing alarms and hiding them in drawers. A review of the Plan of Care, dated 03/18/12, revealed interventions included to encourage Resident #4 to be in up in the lobby for observation and not to be left unattended while up in the wheelchair.</p> <p>A review of the "Fall/Change in Functional Status," dated 03/30/12, revealed a CNA found Resident #4 sitting in the floor of his/her room unattended. The resident stated he/she was trying to walk from the bathroom to the bedroom, reached for the door jam, missed it, and fell to the floor. The facility assessed for injuries and found a skin tear on the left elbow, as well as a complaint of hip pain. A review of the "Incident Accident Tracking Log," dated 03/30/12 at 8:30 PM, revealed Resident #4 was trying to go to the bathroom unassisted after he/she disconnected the alarms. An interview with CNA #8, on 04/19/12 at 3:00 PM, revealed the fall, on 03/30/12, occurred during the dinner meal while Resident #4 was in his/her room alone. CNA #8 described the routine for CNAs during mealtime was to "patrol" the hallway while residents ate meals in their rooms. She passed Resident #4's room and observed him/her sitting on the floor. The resident reported he/she reached for the door jam and fell backwards onto his/her bottom. An interview with RN #5, on 04/20/12 at 9:10 AM, revealed she was assisting in the dining room and was notified that Resident #4 fell. RN #5 returned to the unit after 10 minutes and found that the staff had assisted the resident to the</p>	F 323

F 323	<p>Continued From page 21</p> <p>wheelchair, and he/she complained of hip pain. The physical assessment, completed at that time, revealed no obvious deformity and the resident was able to bear weight on his/her leg. RN #5 reported the staff informed her that the alarms sounded when Resident #4 fell and the staff arrived to his/her room to find him/her sitting on the floor. However, the facility did not identify Resident #4's care plan was not being followed as the resident was unattended in his/her room, was not in the lobby, and had alarms in place after they had been discontinued on 03/16/12. An intervention was added to keep the resident in the hallway while up in his/her wheelchair.</p> <p>A review of the Plan of Care, dated 03/30/12, revealed the interventions were updated to include a pressure alarm to the resident's wheelchair even though the facility had discontinued this intervention on 03/16/12 because the Resident #4 would disconnect and hide the alarms.</p> <p>A review of the physician's order, dated 03/30/12, revealed an authorization to x-ray Resident #4's left shoulder, left hip and left knee. A review of the nurse's note, dated 03/31/12 at 7:00 AM, revealed the x-ray results showed Resident #4 had a left hip fracture. The physician was notified and the facility transferred Resident #4 to the Emergency Room at 8:45 AM on 03/31/12.</p> <p>A review of the admission information, dated 04/06/12 at 6:00 PM, revealed Resident #4 was admitted to the facility after surgical repair of a left hip fracture which was sustained in the facility on 03/30/12. The facility continued to assess the resident at high risk for falls. Further review the</p>	F 323

F 323	<p>Continued From page 22</p> <p>Interim Plan of Care, dated 04/08/12, revealed interventions included the bed was to be in the lowest position, a verbal reminder to not ambulate alone, assistance with transfers and ambulation as needed, observe for unsteady gait, dizziness, and intervene as needed, and pressure bed alarm and chair alarm. There were no documented interventions to address Resident #4's ability to remove the alarms or the need for increased supervision due to the resident's history of falls in the facility or recent fall resulting in a hip fracture requiring surgical repair.</p> <p>A review of the "Fall/Change in Functional Status," dated 04/16/12, revealed Resident #4 was found sitting on the floor of room and "seemed" to be working on his/her television with a metal rod from the wheelchair brake system. The physical assessment revealed no apparent injury was sustained. An interview with CMT #3, on 04/20/12 at 10:30 AM, revealed Resident #4 was found sitting on the floor in his/her room with the wheelchair behind him/her. The resident had the television remote in his/her hand and was "fiddling with it." It "appeared" the resident sat on the floor to work on the television in an attempt to quiet the alarms which were sounding. An interview with RN #5, on 04/20/12 at 9:10 AM, revealed she did not think the resident had fallen; however, the fall was unobserved so it must be treated as a fall. She believed Resident #4 thought the television made the alarm sound and worked on the television to make the alarm stop sounding. She stated Resident #4 was returned to the wheelchair and distracted with activities and left alone in the room.</p>	F 323

F 323	Continued From page 23  A review of the Plan of Care for falls, dated 04/16/12, revealed an intervention for the resident to be in the lobby while up in the wheelchair as the resident was non-compliant with alarms. However, there was no documented evidence the facility addressed the alarm intervention.  A review of the "Fall/Change in Functional Status," dated 04/17/12, revealed Resident #4 suffered two (2) falls within one hour to one and a half (1.5) hours. Resident #4 was found sitting on the floor with one elbow on the bed and one elbow on the seat of the wheelchair. The resident was assisted back to the wheelchair and the alarms were turned off. RN #5 transferred the resident back into the wheelchair and left the room to get equipment necessary for the post falls physical assessment. Resident #4 was left alone in his/her room at that time. An interview with RN #5, on 04/20/12 at 9:10 AM, revealed she believed the first unobserved incident on this date was a "true fall." Resident #4 was alone in his/her room when the chair and bed alarms sounded. RN #5 found the resident sitting on the floor, next to the bed, with one (1) elbow on the bed and one (1) elbow in the seat of the wheelchair. Resident #4 was returned to the wheelchair and RN #5 left the room to get assessment equipment. A review of the "Incident Accident Tracking Log," dated 04/17/12 at 2:30 PM, revealed "the resident was moving in bed and the pressure alarm went off. The resident tried to turn the alarm off and fell out of the bed." Interventions included to offer toileting, snacks or for the activities staff to spend one-to-one time with the resident.	F 323

F 323	Continued From page 24  Further review of the Fall/Change In Functional Status report, dated 04/17/12 revealed Resident #4 sustained a second fall at 4:00PM. RN #5 returned to the resident's room after leaving to obtain physical assessment equipment to find Resident #4 on his/her hands and knees on the opposite side of the bed. He/she was trying to pull the bed control cord from the bed frame. A review of the post falls physical assessment revealed no injuries. An interview with RN #5, on 04/20/12 at 9:10 AM, revealed RN #5 found Resident #4 on the opposite side of the bed, on hands and knees, trying to pull the bed control cord from the bed frame when she returned to the resident's room with the physical assessment equipment. RN #5 did not believe the second incident was a true fall because the resident was found on his/her hands and knees and pulling on the bed control cord. However, the resident was unattended and the fall was not observed which mandated the fall protocol be initiated. RN #5 stated the "alarms seem to agitate [him/her]."  A review of the Incident Accident Tracking Log, dated 04/17/12 at 4:00 PM, revealed the resident was trying to go to bed unassisted and fell. Interventions included to apply goni sleeves, medications were reviewed, and the resident was started on anti-anxiety medication. There was no evidence the facility attempted to determine the root cause of the falls related to the information provided on the Incident Accident Tracking Log dated 04/17/12 compared to the information provided on the Fall/Change in Functional Status report. The Incident Accident Tracking Log listed the root cause of the incident as "Resident was	F 323

F 323	<p>Continued From page 25</p> <p>moving in bed, pressure bed alarm went off. Resident tried to turn off alarm and fell out of bed." Information provided by Resident #4's charge nurse at the time of the fall was documented on the Fall/Change in Functional Status report describing the resident was found sitting on the floor with one elbow on the bed and one elbow on the seat of the wheelchair. An interview with RN #5, on 04/20/12 at 9:10 AM, revealed Resident #4 was alone in his/her room when the chair and bed alarms sounded. RN #5 found the resident sitting on the floor, next to the bed, with one (1) elbow on the bed and one (1) elbow in the seat of the wheelchair.</p> <p>A review of the Plan of Care, dated 04/17/12, revealed an intervention was added to treat the resident's pain routinely. The facility did not implement any interventions related to falls prevention or resident safety, on 04/17/12, related to the falls sustained that day. On 04/18/12, an intervention was added to discontinue use of the Norvasc medication and initiate use of Lorazepam for anxiety. A review of the physician's order, dated 04/18/12, revealed a medication change from Norvasc (recommended for high blood pressure) to Ativan (recommended for anxiety) related to frequent falls. However, there was no evidence that the facility considered potential side effects of the drug change as the drug Ativan acts by slowing activity in the brain and may cause side effects to include drowsiness, dizziness, weakness, and shuffling gait.</p> <p>An interview with CNA #7, on 04/20/12 at 12:40</p>	F 323

F 323	<p>Continued From page 26</p> <p>PM, revealed Resident #4 did not like the alarms and wanted to try to go to the bathroom alone. CNA #7 revealed the common occurrence of the resident leaning forward in the wheelchair caused the pressure chair alarm to sound, which agitated Resident #4. On 04/17/12, CNA #7 found Resident #4 in his/her room alone after the chair alarm sounded. CNA #7 revealed Resident #4 was taken for activities but would leave the activity and return to his/her room. Supervision after the falls included taking the resident out of the room while in the wheelchair and parking the resident's wheelchair at the nurse's station; however, he/she always wanted to return to the room, and was able to self-propel back to his/her room.</p> <p>An interview with CMT #3, on 04/20/12 at 10:30 AM, revealed her knowledge of the falls, on 04/17/12, came as a request from the Charge Nurse for pain medication indicating pain as the possible reason for Resident #4's agitation. CMT #3 stated she gave the pain medication Lortab 5/325 milligrams (mg) as requested by the Charge Nurse.</p> <p>An observation, on 04/18/12 at 11:40 AM, revealed Resident #4 was in bed with his/her eyes closed and was unattended.</p> <p>On 04/19/12 at 8:55 AM, the resident was returned to the room from physical therapy. He/she refused to be toileted and refused to go to bed. The resident stated he/she would rather be outside in the sun. F 323	<p>Continued From page 29</p> <p>Interview with CNA #7, on 04/20/12 at 12:40 PM, revealed Resident #4 started going to the television room on another unit within the past week. The resident was unsupervised while in the television room. The staff assigned to Resident #4 relied on the staff from another unit when the resident traveled to the television room and called the nurses to alert them that the resident was going to the television room. CNA #7 specifically recalled the resident being in the television room unsupervised at 7:00 AM on the morning of 04/17/12. CNA #7 stated she was constantly looking for the resident as he/she was too quick and "you pretty much have to be there all the time." CNA #7 reported there was only one (1) CNA on the hallway when she worked and she could not keep the resident from going into his/her room, so she had to listen for the alarms.</p> <p>Interview with RN #4, on 04/20/12 at 1:45 PM, revealed the staff tried to keep Resident #4 in sight, but he/she was mobile and went to his/her room when he/she wanted to. RN #4 stated Resident #4 had no safety awareness and returned to his/her room where he/she was unsupervised.</p> <p>An interview with the DON, on 04/20/12 at 3:10 PM, revealed the facility had staffing to ensure adequate supervision was provided for Resident #4 to keep him/her safe. The DON stated if the nursing staff was busy, she could notify other facility departments, such as activities or the chaplain, to attend to the resident. The DON stated Resident #4 cannot be forced to stay at the nurse's station and the staff cannot keep the</p>	F 323

F 323	<p>Continued From page 30</p> <p>resident on one-to-one supervision, as the staff had to take care of other residents. The DON reported the facility ensured the safety of Resident #4 the same way as they do for all residents by moving around the facility and ensuring whereabouts of the residents. Another method of ensuring safety, reported by the DON, was "team tackling" and described this method as part of internal audits and the review of different topics each day. However, the facility continued to use interventions of alarms which staff detailed agitated the resident. Furthermore, the facility specified the resident was not to be left alone in his/her room and to be up in the lobby, but the resident was consistently found in the room unattended and found on the floor and considered to have fallen, even after the resident experienced a hip fracture requiring surgical repair. Furthermore incidents reports continued to detail the resident was attempting to go to the bathroom unassisted with no documented evidence that the facility addressed new interventions to prevent the resident from attempting to go to the bathroom unassisted.</p> <p>2. A record review revealed the facility admitted Resident #1 on 10/17/07 with diagnoses to include Cerebral Vascular Accident (CVA) with left-sided Hemiparesis and Psychoses with hallucinations.</p> <p>A review of the quarterly MDS assessment, dated 02/02/12, revealed the facility assessed Resident #1 as cognitively intact and he/she required minimal assistance of one staff for ambulation. A review of the Falls assessment, dated 02/02/12, revealed the facility assessed Resident #1 at high risk for falls.</p>	F 323

F 323	Continued From page 31  A review of the Comprehensive Care Plan for falls, dated 02/06/12, revealed the facility developed interventions for Resident #1 to have a personal alarm on at all times while up in the wheelchair and a pressure alarm on while in the bed.  A review of the Licensed Nurse Treatment Record, dated 04/12, revealed Resident #1 was suppose to have a personal alarm while up in the wheelchair and a pressure bed alarm on the bed at all times.  A review of the CNA Treatment Record, dated 04/12 revealed Resident #1 was suppose to have a personal alarm while up in the wheelchair, and to check placement and function every shift, and for a pressure bed alarm, check placement and function every shift.  Observations on 04/18/12 at 10:30 AM, 3:50 PM, 4:36 PM and 4:55 PM, and on 04/19/12 at 9:30 AM, 10:55 AM, 11:40 AM and 1:50 PM, revealed Resident #1 was up in the wheelchair with no alarm in place. Review Licensed Nurse Treatment Record revealed the licensed staff initiated the Treatment Record on 04/18/12 and 04/19/12 for both shifts (7A-7P and 7P-7A) indicating the alarm was in place and had been checked by the licensed staff. Further review CNA Treatment Record revealed CNAs indicated the alarm was in place and functioning on the Treatment Record on 04/18/12 and 04/19/12 for both shifts (7A-7P and 7P-7A).  An observation and interview with LPN #1, on 04/19/12 at 10:10 AM, revealed Resident #1 was	F 323
