

# Kentucky Department for Public Health Weekly Influenza Surveillance Report Morbidity and Mortality Weekly Report (MMWR) Week 6 February 4, 2018 – February 10, 2018

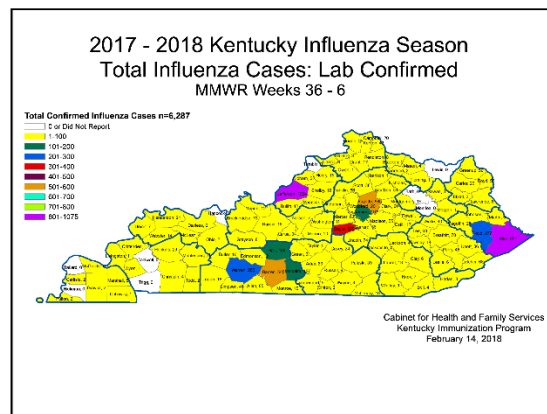

## Current Influenza Activity Level: **Widespread for Ninth Consecutive Week**

**Widespread:** Outbreaks of influenza or increases in ILI and recent laboratory confirmed influenza in at least half the regions of the state with recent laboratory evidence of influenza in the state.

**Confirmed:** Influenza laboratory Confirmed Cases are defined by positive molecular virus (RT-PCR) or Virus Culture test results. Those positive test results are reportable in Kentucky. (Positive results for Rapid Influenza Diagnostic Tests are not included in this report)

Activity Level Range: Sporadic Local Regional Widespread

Update for week 6:		Update Total for weeks 36-6:	
<b>Lab Confirmed Influenza:</b>	<b>1,023 Cases</b>	<b>Lab Confirmed Total:</b>	<b>6,287 Cases</b>
<b>Number of Regions with Long Term Care Facility Outbreaks:</b>	<b>6 of 17 Regions</b>	<b>Total Number of Long Term Care Facility Outbreaks:</b>	<b>100 Outbreaks</b>
<b>Number of Regions with Confirmed Flu Cases:</b>	<b>17 of 17 Regions</b>	<b>Total Number of Regions with Confirmed Flu Cases:</b>	<b>17 of 17 Regions</b>
<b>Deaths Reported:</b>	<b>0 (under 18 years) 31 (18 years &amp; older)</b>	<b>Total Deaths Reported:</b>	<b>4 (under 18 years) 128 (18 years &amp; older)</b>
<b>Number of Regions with Increased ILI Activity:</b>	<b>11 of 17 Regions</b>		
<b>Number of Regions with Increased Influenza Activity (see page 3):</b>	<b>14 of 17 Regions</b>

Purchase	0/3	1			3	
<b>**Total:</b>	20/96 reporting	11/17 regions	6/17 regions	11/17 regions	17/17 regions	14/17 regions

\*\*Total number of regions reporting category of activity not total number of influenza cases

Data Source: Kentucky National Electronic Disease Surveillance System (NEDSS) and U.S. Outpatient Influenza-like Illness Surveillance Network (ILINet) Data. Department for Public Health, Cabinet for Health and Family Services, Frankfort, Kentucky, [February 4, 2018 – February 10, 2018].

National Data  
2017-2018 Influenza Season  
Week 5 ending February 3, 2018

*All data are preliminary and may change as more reports are received.*

*\*Week 6 will be available February 22nd and will be attached on the next report.*

## Synopsis:

During week 5 (January 28-February 3, 2018), influenza activity increased in the United States.

- **Viral Surveillance:** The most frequently identified influenza virus subtype reported by public health laboratories during week 5 was influenza A(H3). The percentage of respiratory specimens testing positive for influenza in clinical laboratories remained elevated.
- **Pneumonia and Influenza Mortality:** The proportion of deaths attributed to pneumonia and influenza (P&I) was above the system-specific epidemic threshold in the National Center for Health Statistics (NCHS) Mortality Surveillance System.
- **Influenza-associated Pediatric Deaths:** Ten influenza-associated pediatric deaths were reported.
- **Influenza-associated Hospitalizations:** A cumulative rate of 59.9 laboratory-confirmed influenza-associated hospitalizations per 100,000 population was reported.
- **Outpatient Illness Surveillance:** The proportion of outpatient visits for influenza-like illness (ILI) was 7.7%, which is above the national baseline of 2.2%. All 10 regions reported ILI at or above region-specific baseline levels. New York City, the District of Columbia, Puerto Rico and 43 states experienced high ILI activity; three states experienced moderate ILI activity; two states experienced low ILI activity; and two states experienced minimal ILI activity.
- **Geographic Spread of Influenza:** The geographic spread of influenza in Puerto Rico and 48 states was reported as widespread; two states reported regional activity; the District of Columbia and Guam reported local activity; and the U.S. Virgin Islands reported sporadic activity.
