

## Who will provide my services?

You will choose your providers from the existing available services providers. You will participate in all decisions about your services and service providers.

You may choose to self-direct your non-medical, non-residential services (homemaking, personal care, respite, attendant care, etc) through the [Consumer Direct Option](#) (CDO) program. This program allows you to hire your own employees to provide those services to you. You will be given a budget and will be able to develop your own services schedule and negotiate what you pay your employees within Medicaid guidelines. You will be given information on CDO during the transition planning.
