F 000	<p>INITIAL COMMENTS</p> <p>AMENDED</p> <p>An Abbreviated Survey investigating Complaint #KY23207 was conducted on 05/12/15 through 05/18/15 and a Partial Extended Survey was conducted on 05/27/15 through 05/28/15. Complaint #KY23207 was substantiated with deficiencies cited at a Scope and Severity of a "J".</p> <p>On the morning of 03/13/15, Resident #1 was alert to person, place and time, had no long term or short term memory deficits, was continent of bowel and bladder, was on a regular diabetic diet with no chewing or swallowing difficulties, his/her speech was understood and the resident understood others and he/she had no limitations in range of movement. On 03/13/15 at 2:35 PM, Resident #1 was administered two (2) as needed (PRN) medications, Lortab (for pain) and Ativan (for anxiety.) However, the licensed staff failed to document the medication was administered, failed to assess the resident after giving the medications and failed to document the effectiveness of the medications according to professional standards of quality and per the care plan.</p> <p>Resident #1 was reported to have declines in cognition, weight bearing, transferring, continence, and verbalization after the PRN medications were administered. On 03/13/15 at approximately 6:00 PM, Resident #1's change in condition was reported to Licensed Practical Nurse (LPN) #2; however, there was no documented evidence licensed staff conducted an assessment related to the resident's decline</p>	F 000	<p>Submission of this plan of correction is not a legal admission that a deficiency exists or that this statement of deficiency was correctly cited, and is also not to be construed as an admission of interest against the facility, the Administrator or any employees, agents, or other individuals who draft or may be discussed in this response and plan of correction. In addition, preparation of this plan of correction does not constitute an admission or agreement of any kind by the facility of the truth of any facts alleged or see the correctness of any allegation by the survey agency. Accordingly, the facility has prepared and submitted this plan of correction prior to the resolution of any appeal which may be filed solely because of the requirements under state and federal law that mandate submission of a plan of correction within (10) days of the survey as a condition to participate in Title 18, and Title 19 programs. The submission of the plan of correction within this timeframe should in no way be construed or considered as an agreement with the allegations of noncompliance or admissions by the facility. This plan of correction constitutes a written allegation of submission of substantial compliance with Federal Medicare Requirements.</p>

LABORATORY DIRECTOR'S OR PROVIDER/SUPPLIER REPRESENTATIVE'S SIGNATURE <i>V. Edward Foley</i>	TITLE <i>Interim Administrator</i>	(X6) DATE 07/06/15
---	---------------------------------------	-----------------------

Any deficiency statement ending with an asterisk (*) denotes a deficiency which the institution may be excused from correcting providing it is determined that other safeguards provide sufficient protection to the patients. (See Instructions.) Except for nursing homes, the findings stated above are disclosable 90 days following the date of survey whether or not a plan of correction is provided. For nursing homes, the above findings and plans of correction are disclosable 14 days following the date these documents are made available to the facility. If deficiencies are cited, an approved plan of correction is requisite to continued program participation.

F 000	Continued From page 1 and notified the physician. The resident continued to decline and on 03/14/15 at 11:00 AM, approximately eighteen hours (18) hours later, he/she was unresponsive to sternal rubs and was sent out to the hospital, where it was determined the resident had a massive stroke. TPA (Tissue Plasminogen Activator), a medication given to break down blood clots, was not administered because the time the resident was last known well, was greater than three (3) hours prior to arrival." The resident was readmitted to the facility, on 03/27/15, with a diagnosis of Cerebrovascular Accident (CVA) and Dysphagia (swallowing difficulty), requiring the placement of a Gastrostomy Tube (G-Tube) and again after a hospital stay on 04/10/15, due to leakage of fluids around the G-Tube site. The resident remained non-verbal, dependent on a G-Tube for nutritional support, incontinent and totally dependent on staff for all care needs. The resident was sent to the hospital, on 05/06/15 at approximately 7:40 AM, for a possible infection from the G-Tube site and did not return to the facility. Immediate Jeopardy (IJ) was identified in the areas of 42 CFR 483.10 Resident Rights at F157; 42 CFR 483.20 Resident Assessment at F281 and F282; 42 CFR 483.25 Quality of Care at F309; and CFR 483.75 Administration at F514, at a Scope and Severity of a "J". Substandard Quality of Care was identified at 42 CFR 483.25 Quality of Care. Immediate Jeopardy was identified on 05/18/15 and determined to exist on 03/13/15. The facility was notified of the Immediate Jeopardy on 05/18/15. An acceptable Allegation of Compliance (AoC) was received on 05/22/15, alleging the removal of Immediate Jeopardy on 05/21/15. The LPN stated no one made her aware that Resident #1 had a change in condition and the resident was "OK" when she left at 6:00 PM so she had no need to call the physician. However, review of the Nursing Notes and review of the March 2015 Electronic Medication Administration Record (EMAR) revealed there was no documented evidence the nurse assessed the resident to determine the effectiveness of the PRN medications and if there was a significant change in condition to determine the need to notify the Physician/Responsible Party.</p> <p>Interview with LPN #2, on 05/15/15 at 11:10 AM; and, on 05/16/15 at 3:28 PM, revealed the LPN worked the 6:00 PM - 6:00 AM shift, on 03/13/15. She stated the resident was sleeping as she made rounds at the start of her shift. LPN #2 stated the resident's spouse was visiting at the bedside and the resident never fully awakened, throughout the night, yet pulled his/her arm away when vital signs and accu-checks (for blood sugar testing) were administered. The LPN stated no one made her aware of any change in the resident's condition. LPN #2 stated the resident was resting well from receiving the PRN medications and she felt there was no change in condition to warrant calling the physician. However, review of the Nurse's Notes revealed no documented evidence LPN #2 assessed the resident to determine if there was a need to notify the physician.</p> <p>Review of a Nurse's Note documented by Registered Nurse (RN) #1, dated 03/14/15 at 8:47 AM, revealed "Resident has been very</p>	F 157

F 157	<p>Continued From page 12</p> <ol style="list-style-type: none"> Resident #1 no longer resides at the facility. On 05/18/15, assessments were conducted for eighty-one (81) of eighty-one (81) current residents, to determine if there were any medical needs requiring physician notification that the physician was not already aware of. This assessment included vital signs, respiratory assessment, bowel sounds, and changes in level of consciousness. There were no identified residents with a change in condition that the physician was not aware of, or that required further physician notification. The DON and ADON conducted an audit of all current residents, on 05/18/15, to identify any resident who had received an as needed (PRN) pain medication, in the past twenty four hours and to ensure that a follow up to the effectiveness or adverse side effects of the PRN pain medication was completed. There were no noted adverse side effects of any PRN pain and all had effect relief of pain and there were no identified residents with a change in condition that the physician was not aware of or requiring further physician notification. On 05/18/15 through 05/19/15 the DON, ADON, Unit Managers and the MDS Coordinator reviewed all current residents' plans of care to determine if all interventions were being followed and any identified interventions not in place were immediately put into place. On 05/18/15, the Regional Quality Manager re-educated the DON, ADON, Unit Managers for all three units (Units One (1), Two (2) and Three (3) and the MDS Coordinator on Physician Notification for a significant change in condition, 	F 157

F 281	<p>Continued From page 19</p> <p>The services provided or arranged by the facility must meet professional standards of quality.</p> <p>This REQUIREMENT is not met as evidenced by: Based on interview, record review, review of the hospital's Physician Consultation Reports, the facility's policy and procedure and the Kentucky Board of Nursing (KBN) Advisory Opinion Statement (AOS) #27 "Components of Licensed Practical Nursing (LPN) Practice", it was determined the facility failed to ensure services provided by the facility met the professional standards of quality for one (1) of three (3) sampled residents (Resident #1).</p> <p>On 03/13/15 at 2:35 PM, Resident #1 was administered two as needed (PRN) medications, Lortab (for pain) and Ativan (for anxiety.) LPN #1 failed to assess the resident according to professional standards of quality, after giving the medications and failed to document the effectiveness of the medications. LPN #2 failed to assess the resident at the beginning of the shift and also failed to assess the resident after Certified Nurse Aide (CNA) #1 and a family member complained the resident needed the assistance of three (3) staff to assist back into bed; and, when staff made the licensed nurses aware they were unable to awaken the resident. The resident continued to decline and on 03/14/15, approximately eighteen (18) hours later, he/she was unresponsive to sternal rubs and was sent out to the hospital, where it was determined the resident had a massive stroke.</p> <p>The facility's failure to ensure care was provided</p>	F 281	<p>not already aware of including vital signs, respiratory assessment, bowel sounds and changes in level of consciousness. This was completed by the Director of Nursing, Assistant Director of Nursing and Unit Managers. There were no concerns identified. On 05/18/2015 the Director of Nursing and Assistant Director of Nursing conducted an audit of all current resident to identify any resident who had received an as needed (PRN) pain medication in the past twenty four hours and to ensure that a follow up to the effectiveness or adverse side effects of the PRN pain medication was completed. There were no noted adverse side effects of any PRN pain medications and all had effective relief of pain.</p> <p>3. On 05/18/2015 the Regional Quality Manager re-educated the Director of Nursing, Assistant Director of Nursing and Unit Managers and MDS coordinator on physician notification for a significant change in condition based on the INTERACT program, developed under funding from CMS to prevent unnecessary acute care transfers to provide guidance to nurses on when to notify the physician and care paths for certain common symptoms to help guide assessment and assist in completing a thorough assessment. Training included conducting an assessment based on resident condition with follow up</p>

F 281	<p>Continued From page 20</p> <p>according to the professional standards of practice has caused or is likely to cause serious injury, harm, impairment or death to a resident. Immediate Jeopardy was identified on 05/18/15 and determined to exist on 03/13/15. An acceptable Allegation of Compliance (AoC) was received on 05/22/15, alleging the IJ was removed on 05/21/15. The State Survey Agency validated the Immediate Jeopardy was removed on 05/21/15, as alleged. The Scope and Severity was lowered to a "D" while the facility develops and implements the Plan of Correction (PoC) and the facility's Quality Assurance (QA) monitors the effectiveness of the systemic changes.</p> <p>The findings include:</p> <p>Review of the KBN AOS #27 "Components of Licensed Practical Nursing (LPN) Practice", last revised 06/2014, revealed components of the LPN practice included assessment and interpretation of data. Assessment includes observations of appearance and behavior; measurements of physical structure and physiologic function; and observations of a resident's subjective and objective signs and symptoms. Interpreting data includes recognizing existing relationships between data gathered and a resident's health status, established plan of care and medical treatment regimen; determining the resident's need for nursing intervention based upon data gathered regarding the resident's health status, ability to care for self, and established plan of care; and appropriate consultation.</p> <p>Review of Resident #1's closed record revealed the facility admitted the resident on 03/12/15 with diagnoses which included Contusion of the Knee</p>	F 281	<p>assessments as well as physician notification and use of the 911 system in an emergent situation. Competency test were administered to validate understanding and all received 100% accuracy. Beginning 05/18/2015 and ongoing all licensed staff were re-educated b the DON, ADON and Unit Managers on physician notification for a significant change in condition based on the INTERACT program, developed under funding from CMS to prevent unnecessary acute care transfers to provide guidance to nurses on when to notify the physician and care paths for certain common symptoms to help guide assessment and assist in completing a thorough assessment. Training included conducting an assessment based on resident condition with follow up assessments as well as physician notification and use of the 911 system in an emergent situation. Training also included documentation of follow up assessment for effectiveness and adverse side effects in the emar system. Competency test were administered to validate understanding and all received 100% accuracy. No Licensed Nurse will work after 05/20/2015 without having received this re-education and pass competency test with 100% accuracy. Beginning 05/18/2015 all Nursing Assistants were re-educated with competency test by the DON,</p>

F 281	<p>Continued From page 22</p> <p>revealed the resident was unresponsive to two (2) sternal rubs and was sent to the Emergency Room (ER) at 11:34 AM. Further review of the EMARs revealed no evidence of the documentation of the pm medications and no evidence of follow-up assessments of the pm medication.</p> <p>Interview with LPN #1, on 05/15/15 at 9:55 AM and, on 05/18/15 at 3:38 PM, revealed she worked the 6:00 AM to 6:00 PM shift on 03/13/15. LPN #1 stated the resident had repetitive complaints and both the resident and his/her spouse requested the resident have something for pain and anxiety. The LPN stated she had given Lortab five (5)/325 milligrams (mg) and Ativan 0.5 mg, as a PRN, on 03/13/15, at approximately 2:30 PM, for the resident's complaints of nervousness and chronic pain. LPN #1 stated this was the first time the resident had received these medications, at the facility. The LPN stated she was unsure why the Ativan was not mentioned in the Nursing Notes, the medications were not documented on the EMARS and the results of the effectiveness of the PRNs were not documented. LPN #1 stated it had been a very busy week and she "probably forgot." The LPN was unable to remember if the resident had been assessed, prior to her completing her shift at 6:00 PM. She stated the resident was "sitting up eating supper when I left and was OK." However, review of the Meal Consumption Records for 03/13/15 revealed Resident #1 "refused" supper.</p> <p>Interview with Certified Nursing Assistant (CNA) #2, on 05/15/15 at 11:40 AM, revealed she was told Resident #1 had just received PRN medication and the resident was up in a chair and</p>	F 281	<p>present for PRN medications, This was completed daily until removal of the Immediate Jeopardy then completed five (5) times per week for twelve (12) weeks. Beginning 05/19/2015 the DON, ADON, or Unit Managers will review all nurses noted to determine if any significant change in condition has occurred without physician notification and that follow up assessment and documentation is occurring based on the clinical condition. This occurred daily including weekends until removal of the Immediate Jeopardy and then five (5) times per week for twelve weeks thereafter. The results of all audits will be reviewed with the Quality Assurance Committee weekly until substantial compliance is achieved and then monthly thereafter for at least three months. Any time concerns are identified the Quality Assurance Committee will convene to review and make further recommendations. The Quality Assurance Committee will consist of at a minimum the Director of Nursing, Assistant Director of Nursing, Dietary Services Director, Maintenance Director, Activity Director and Business Office Manager Administrator, with the Medical Director attending at least quarterly.</p>	06/05/15

CNA #1 stated he had to have two (2) ambulance attendants assist him to put the resident to bed because he/she was "dead weight". Resident #1's Spouse stated he/she informed the staff this was a change for the resident as he/she had never slept more than two (2) hours at a time due to all the pain from a previous fracture. CNA #1 and the Resident's Spouse were concerned with the resident's condition and they notified LPN #2 but were "assured it was due to the (PRN) medications."</p> <p>Review of the Nurse's Notes, dated 03/13/15 and 03/14/15; and, review of the March 2015 Electronic Medication Administration Records (EMARs) revealed there was no documented evidence LPN #1 or LPN #2 assessed the resident to determine the effectiveness and/or side effects of the medications; assessed for any neurological changes in the resident; or monitored the resident for confusion and behaviors and reported to the physician, as stated in the plan of care.</p> <p>Interview with LPN #1, on 05/15/15 at 9:55 AM; and, on 05/18/15 at 3:38 PM, revealed she was unsure why the results of the effectiveness of the PRNs were not documented and stated it had been a very busy week and she "probably forgot." The LPN was unable to remember if the resident had been assessed, prior to her leaving her shift at 6:00 PM. However, there was no documented evidence the resident was assessed.</p> <p>Interview with LPN #2, on 05/15/15 at 11:10 AM; and, on 05/16/15 at 3:28 PM, revealed she worked the 6 PM - 6 AM shift, on 03/13/15. LPN #2 stated the resident was resting well from receiving the PRN medications and she felt there was no change in the resident's condition to require further assessment or warrant calling the physician. LPN #2 stated no one had told her that Resident #1 had experienced a change in condition.</p> <p>Review of a Nursing Note, dated 03/14/15 at 8:47 AM, and interview with RN #1 on 05/15/15 at 8:25 PM and 10:40 AM; and, on 05/17/15 at 4:09 PM, revealed Resident #1 was unresponsive on 03/14/15, and he felt it was because the resident received pain medication prior to his shift. The RN stated he did an assessment of the resident at 8:47 AM and stated there was no facial drooping, yet the resident was unable to follow commands to stick out his/her tongue or grip hands. He stated he had to "hold the resident's eyes open" to assess the pupils, which were noted to have been "sluggish." The RN stated he was aware of the need to call the physician with any changes per the care plan, but he felt the need to get a second opinion on the resident's condition from another nurse (RN #2), who came to assess the resident at approximately 11:00 AM. He stated RN #2 administered two (2) sternal rubs on the resident and the process was begun to get the resident to the ER. The RN stated "looking back, I probably should have sent (him/her) out earlier."</p> <p>Review of the Hospital Physician Consultation Reports, dated 03/14/15, revealed the resident was diagnosed with an Acute Cerebrovascular Accident (CVA-stroke). However, the resident's last skin assessment was completed on 05/01/15 and not due again, until 05/07/15. The resident was transported, per ambulance, to the hospital on 05/06/15.</p> <p>Interview with RN #4, on 05/14/15 at 9:12 AM, revealed she assessed the resident prior to leaving the facility and did leave some of the bright green drainage around the resident's GT site "because I wanted them to see it." The RN stated she also assisted the CNAs to clean the resident, prior to transfer and stated he/she had a fresh gown and linens and stated the resident was a mouth breather and residents with this and a GT will have a "thrushy mouth". The RN stated the resident was a Full Code and she was afraid he/she had developed a "massive infection of some sort" and stated it did not take fifteen (15) minutes to get the resident out to the ER and she did not notice a problem with the fingernails. The RN stated she took the report from the hospital, and the hospital staff stated it took them over an hour to clean the resident up. The RN revealed she reported the call to the Director of Nursing (DON).</p> <p>Interview with the DON, on 05/15/15 at 12:35 PM, revealed all residents' nails would be kept clean on a daily basis and trimmed as necessary and all nails would be trimmed by the nursing assistants except for the diabetic residents and their nails would be trimmed by the licensed nurse. The DON stated she would have expected the nail and mouth care to have been completed, as specified on the care plan.</p>	F 282

F 282	<p>Continued From page 49</p> <p>10.45 AM, revealed audits for residents' change of condition, notification of physician, and follow-up assessments were done on each shift until the AoC was accepted, and were now being done five times a week for twelve weeks. She stated the results of these audits will be reviewed in the QA Meetings.</p> <p>8. Review of audits conducted by the DON, ADON or Unit Manager revealed five (5) residents' plans of care were reviewed to evaluate if interventions were in place and being followed.</p> <p>9. Review of daily audits conducted by the DON, ADON, Unit Managers, or the MDS Coordinator revealed all narcotic records were audited daily, to identify any PRN pain medication administered and compared to EMAR records, to validate that follow up to effectiveness and adverse side effects of PRN pain medications was documented.</p> <p>10. A review of the QA meetings, dated 05/20/15, 05/21/15 and 05/22/15, revealed the agenda regarded concerns with the allegation deficiencies as well as the annual survey deficiencies, complaint, and facility self-reported complaints. The meeting was attended by the Administrator, DON, Activities Director, MDS Coordinator, Business Office Manager, Dietary Services Manager, Medical Records, Housekeeping and Maintenance and the Marketing Manager. Interview with the Medical Clinical Officer (MCO) revealed the Medical Director attended the 05/18/15 meeting, by phone and was kept abreast of any concerns and the meetings were to continue weekly, then monthly until resolved.</p>	F 282

F 309	<p>Continued From page 54</p> <p>Appetite good. Fluids given with good results. Able to make wants and needs known. Resident is very needy and demanding. Continent of bowel and bladder. Feeds self with tray set up." However, review of the March 2015 Electronic Medication Administration Record revealed there was no documented evidence the medications had been administered and further review revealed there was no documented evidence in the EMAR or Nursing Notes that a follow-up assessment to determine the resident's response to the medications was conducted.</p> <p>Interview with Certified Nursing Assistant (CNA) #1, on 05/15/15 at 11:35 AM, revealed he had worked with Resident #1 on 03/13/15, on the 2:30 PM - 10:30 PM shift and noticed a change in the resident, from the previous afternoon (03/12/15.) CNA #1 stated on 03/12/15, the resident had frequently requested the bedpan and was able to roll over on his/her side and hold to the side rail and able to ambulate with a walker, after assisting the resident out of the bed or chair. CNA #1 revealed on 03/13/15, the resident was "sleeping in a chair and would not wake up." The CNA stated he called on two (2) Emergency Medical Technicians (EMTs) who were in the building for another resident, to assist him to get the resident out of the chair as he/she was "dead weight," and unable to assist with standing or pivoting. He also stated the spouse was visiting and stated he/she had "never seen the resident like this." CNA #1 revealed vital signs were taken and were within the resident's normal range and the CNA informed the LPN #2 of his and the spouses' concerns and was "assured it was due to the (PRN) medications," that were administered at approximately 3:00 PM.</p>	F 309	<p>Assurance Committee will consist of at a minimum the Director of Nursing, Assistant Director of Nursing, Dietary Services Director, Maintenance Director, Activity Director and Business Office Manager Administrator, with the Medical Director attending at least quarterly.</p>	06/05/15

F 309	<p>Continued From page 55</p> <p>Interview with CNA #2, on 05/15/15 at 11:40 AM, revealed the CNA also worked the 2:30 PM - 10:30 PM shift on 03/13/15 and was told Resident #1 had just received PRN medication and the resident was up in a chair and "dozing off" at the start of the shift and the CNA stated she tried to wake the resident "just before supper," and the resident would not wake up or eat supper. The CNA stated the resident would open his/her eyes but go right back to sleep and had to be assisted back to bed and the resident had previously been able to transfer him/herself with a walker and the CNA "figured it was just the medication," and stated "nobody knew much about him/her."</p> <p>Interview with Resident #1's Spouse, on 05/12/15 at 9:50 AM and 05/17/15 at 5:11 AM, revealed the spouse had visited the resident on 03/13/15 "after supper" and stated the resident never ate the supper meal. The spouse stated staff brought the tray in and sat it on the table and the food had not been touched when the staff came and picked the tray up. The spouse stated the resident "looked drugged out or over-medicated." The spouse also stated it took three (3) people to get the resident back in the bed that afternoon due to the resident being so lethargic. Further interview revealed the spouse revealed two (2) ambulance personnel were in the building and the male CNA asked them to help him get the resident back to bed because he/she was not bearing weight at all. The spouse stated he/she stayed until about 9:00 PM and the resident "looked like (he/she) was gone." The spouse revealed the resident had never had this type of reaction to the medication before and the resident never slept more than two (2) or three (3) hours at a time, because he/she was in so much pain all the time, from a spinal fracture in December</p>	F 309

F 309	<p>Continued From page 59</p> <p>a second opinion on the resident's condition from another nurse working at the time. RN #2 came to assess the resident at approximately 11:00 AM, administered two sternal rubs on the resident and the process was begun to get the resident to the ER, the spouse and physician were called and the resident left the facility at 11:34 AM. The RN stated "looking back, I probably should have sent (him/her) out earlier."</p> <p>Interview with RN #2, on 05/14/15 at 9:15 AM, revealed she was not the resident's assigned nurse on 03/14/15, but was working another area, at approximately 11:00 AM, when RN #1 asked her to come and take a look at the resident. The RN stated the resident was not responsive to sternal rubs and she assisted the staff to get the resident to the ER, as the resident was a Full Code.</p> <p>Interview with the Director of Nursing (DON), on 05/18/15 at 5:30 PM, revealed she was on a medical leave of absence during this time and felt if the LPN had entered the PRN medications into the EMAR, there would have been an automatic pop up to remind the nurse the follow-up assessment was due, regarding the effectiveness or possible side-effects of the PRN medications. However, this was not done, there was no evidence the resident was fully assessed after the PRN, after concerns from CNA #1 and the spouses concerns were made and prior to having unresponsiveness to two sternal rubs and being sent to the ER.</p> <p>Interview with the Assistant Director of Nursing (ADON), on 05/18/15 at 6:00 PM, revealed she also had medical issues during this time frame and had to be out of the facility, but would have</p>	F 309

F 312	Continued From page 68 This REQUIREMENT is not met as evidenced by: Based on observation, interview, and facility policy review, it was determined the facility failed to ensure one (1) of three (3) sampled residents (Residents #1), who was unable to carry out activities of daily living (ADLs) received the necessary services to maintain grooming, and personal and oral hygiene. The facility failed to provide oral hygiene and nail care for Resident #1, prior to sending the resident to the hospital, for evaluation of a change of consciousness. The findings include: Review of the facility Certified Nurse Aide (CNA) training materials from "Lippincott's Textbook for Nursing Assistants," undated, revealed mouth care was to have been provided upon awakening, after meals and before bed. A resident who is unconscious needs frequent mouth care, due to mouth breathing, which causes secretions to thicken and dry on the lips and mouth. The staff was to have kept the resident's mucous membranes of the mouth moist and healthy. Interview with the Director of Nursing (DON), on 05/15/15 at 12:35 PM, revealed all residents' nails would be kept clean on a daily basis and trimmed as necessary and all nails would be trimmed by the nursing assistants except for the diabetic residents and their nails would be trimmed by the licensed nurse. Closed record review revealed the facility readmitted Resident #1 on 03/27/15 with	F 312	F312 1. Resident # 1 was discharged to the hospital on 05/06/2015 and did not return to the facility. 2. On 06/03/2015 the Director of Nursing, Assistant Director of Nursing and Unit Managers conducted an observation of all current residents to determine if all residents were clean and well groomed to include nail care and oral care. No concerns were identified. 3. By 06/04/2015 the Director of Nursing, ADON or Unit Manager re-educated all Certified Nursing Assistants on cleanliness and hygiene including oral care and nail care. No Certified Nursing Assistant will work after 06/04/2015 without having had this re-education. 4. The DON, ADON, or Unit Manager will observe five (5) resident per week for twelve (12) weeks to ensure residents are clean and groomed including oral care and nail care. The results of all audits will be reviewed with the Quality Assurance Committee weekly until substantial compliance is achieved and then monthly thereafter for at least three months. Any time concerns are identified the Quality Assurance Committee will convene to review and make further recommendations. The Quality Assurance Committee will consist

F 312	<p>Continued From page 70</p> <p>there were dark rings on the sheets. CNA #3 stated the Director of Nursing (DON) at the facility had been called and made aware of the hospital's concerns with this resident.</p> <p>Interview with hospital Registered Nurse (RN) #3, on 05/14/13 at 11:13 AM, revealed she was also working at the ER on 05/06/15, when Resident #1 was admitted. RN #3 stated the sheets had "old, dried urine rings around them", his/her nails had "brown sediment packed under the nailbeds and dried blood on the fingertips, from what looked like Accu-checks," taken for blood sugar levels. RN #3 described the resident's mouth as having "caked-on debris in the roof" of the resident's mouth and noted "copious amounts of yellow, dried particles" as the resident's mouth was swabbed. The RN stated the DON was called, as a courtesy, and she did come to the ER to assess the resident and talked to some of the staff working at the hospital.</p> <p>Review of the ER Physician's Clinical Report, dated 05/06/15, revealed the resident arrived at the ER at approximately 7:32 AM and the resident's chief complaint was green drainage "from all orifices," and report on arrival was the resident had very poor mouth care with lots of oral secretions and also some mild drainage from around the GT site but also appeared to have very poor local care around the GT."</p> <p>Interviews on 05/13/15 with CNA #8 at 1:25 PM and CNA #9 at 2:35 PM, revealed both CNAs stated the resident was being turned for incontinent care on the morning of 05/06/14 and was rolled over to the side and a greenish fluid started coming out of the resident's mouth, GT site and rectum and both CNAs stated this had</p>	F 312

F 312	<p>Continued From page 71</p> <p>never occurred with this resident before. The CNAs stated RN #4 was called and assessed the resident and he/she was immediately sent out to the hospital. Both CNAs stated the resident was bathed, mouth care was completed and the resident had clean sheets and a clean gown upon leaving the facility. CNA #8 stated she would clean the resident's mouth every time he/she was turned, approximately every two hours and nail care was done with the bed bath. CNA #9 stated the resident received daily bed baths and mouth care was completed every hour and every time she went into the room, as the resident was a mouth breather and had the feeding tube and always had dried mucous in his/her mouth.</p> <p>Interview with LPN #1, on 05/15/15 at 10:07 AM, regarding mouth care revealed "it seemed like the more the CNAs cleaned (his/her) mouth, the more it needed cleaning." The LPN also stated the CNAs should be completing nail care each shift, when the bed bath was completed and the LPN monitored this during the weekly skin assessments. However, the resident's last skin assessment was completed on 05/01/15 and not due again, until 05/07/15. The resident was transported, per ambulance, to the hospital on 05/06/15.</p> <p>Interview with RN #4, on 05/14/15 at 9:12 AM, revealed she assessed the resident prior to leaving the facility and did leave some of the bright green drainage around the resident's GT site "because I wanted them to see it." The RN stated she also assisted the CNAs to clean the resident, prior to transfer and stated he/she had a fresh gown and linens and stated the resident was a mouth breather and resident's with this and a GT will have a "thrushy mouth". RN #4 stated</p>	F 312

F 312	<p>Continued From page 72</p> <p>the resident was a Full Code and she was afraid he/she had developed a "massive infection of some sort" and stated it did not take fifteen (15) minutes to get the resident out to the ER and she did not notice a problem with the fingernails. The RN stated she took the report, from the hospital and the hospital staff stated it took them over an hour to clean the resident up. The RN revealed she reported the call to the Director of Nursing (DON.)</p> <p>Interview with the DON, on 05/15/15 at 12:35 PM, revealed the DON was notified of the hospital concerns and went to the hospital to assess the resident's condition. The DON stated hospital RN #3 had left two (2) or three (3) "dirty nails for me to see". The DON revealed the reason the resident went to the hospital was due to the foul odor and drainage. The DON stated she did an investigation when she returned to the facility and stated in an emergency situation, the important thing was to get the resident out of the facility, clean, "but nails-not so much." The DON stated she talked to the CNAs, who took care of the resident on 05/06/15 revealed the CNAs stated the sheets had been changed and the resident was known to have fidgeted with scratching motions on his/her skin, as why there was debris under the nails, yet there was no indication of any scratch marks on the skin with a review of the skin assessments or from the staff interviews and the DON stated she would have expected the nail care to have been done.</p> <p>Interview with Resident #1's attending physician at the facility, on 05/13/15 at 1:48 PM, revealed the resident had experienced a massive stroke in March 2015 and had been unresponsive since, requiring a GT for nutrition, albeit the GT never</p>	F 312

F 514	Continued From page 74 The facility failed to document in the clinical record the "as needed" medications administered to Resident #1 on 03/13/15; failed to document the results and effectiveness of the PRN medications on the Electronic Medication Administration Record or in the clinical record; failed to ensure two narcotics, Lortab and Alivan were signed out properly on the Narcotic Count Sheet; failed to document the results of blood sugars taken on 03/13/15; and, failed to document the order for the accuchecks accurately as it was ordered to obtain blood sugars three (3) times a day (TID) and to obtain blood sugars four (4) times a day (QID) on the EMARs. Review of the physician's order, dated 03/12/15, revealed "accuchecks before meals (AC) and at bedtime (HS)". The facility's failure to document narcotics administered in the EMARs, failure to document and complete a follow-up assessment, and failure to accurately document and assess Resident #1's condition, for approximately 18 hours, after medication administration, resulting in the failure of the resident being treated with clot busting medications, during the three hour window of time needed. The facility failed to maintain clinical records that were complete and accurately documented caused, or was likely to cause, serious injury, harm, impairment or death of a resident. Immediate Jeopardy was identified on 05/18/15 and determined to exist on 03/13/15. The facility was notified of the Immediate Jeopardy on 05/18/15. The findings include: Review of the facility's policy and procedure titled,	F 514	determine if there were any medical needs requiring physician notification that the physician was not already aware of including vital signs, respiratory assessment, bowel sounds and changes in level of consciousness. This was completed by the Director of Nursing, Assistant Director of Nursing and Unit Managers. There were no concerns identified. On 05/08/15 the DON and ADON conducted an audit of all current resident's orders to determine if there was an order for accuchecks that it was in Emar correctly and results were being documented. No concerns were identified. 3. On 05/18/2015 the Regional Quality Manager re-educated the Director of Nursing, Assistant Director of Nursing and Unit Managers and MDS coordinator on physician notification for a significant change in condition including documentation based on the INTERACT program, developed under funding from CMS to prevent unnecessary acute care transfers to provide guidance to nurses on when to notify the physician and care paths for certain common symptoms to help guide assessment and assist in completing a thorough assessment. Training included conducting an assessment based on resident condition with follow up assessments as well as physician notification and use of the 911

Materials and sign-in sheets, dated 05/18/15-05/20/15, revealed the DON, ADON and Unit Managers re-educated all licensed staff on the same requirements with a competency test with a minimum score of 100% accuracy required. Staff interviews conducted on 05/28/15 with LPN #4 at 8:35 AM; LPN #5 at 8:51 AM; RN #2 at 10:12 AM; LPN #6 at 10:25 AM revealed the training had been completed and all the licensed staff had passed the test. On 05/18/15 through 05/20/15 all CNAs were re-educated with competency test by the DON, ADON, and the Unit Managers or MDS Coordinator, related to following the plan of care and if they were unable to follow the plan of care they must report it to the Charge Nurse and notify the nurse of a change in condition and going up the chain of command. There were competency tests with a minimum score of 100% accuracy. Staff interviews on 05/28/15 with CNA #4 at 9:17 AM; CNA #5 at 9:25 AM; CNA #6 at 10:35 AM; and CNA #7 at 10:38 AM revealed the staff verified their training had been done and they had been tested regarding the care plans and notification of a change in condition.</p> <p>7. Reviews of the every shift audits, dated 05/18/15 to 05/20/15, revealed the DON, ADON, MDS Coordinator or the Unit Managers, reviewed with facility licensed nursing staff, all current residents conditions each shift, to determine if licensed staff was notifying the physician of significant changes in condition and follow up assessments were occurring based on clinical condition. Interview with the DON, on 05/28/15 at</p>	F 514

F 514	<p>Continued From page 81</p> <p>10:45 AM, revealed audits for residents' change of condition, notification of physician, and follow-up assessments were done on each shift until the AoC was accepted, and were now being done five times a week for twelve weeks. She stated the results of these audits will be reviewed in the QA Meetings.</p> <p>8. Review of audits conducted by the DON, ADON or Unit Manager revealed five (5) residents' plans of care were reviewed to evaluate if interventions were in place and being followed.</p> <p>9. Review of daily audits conducted by the DON, ADON, Unit Managers, or the MDS Coordinator revealed all narcotic records were audited daily, to identify any PRN pain medication administered and compared to EMAR records, to validate that follow up to effectiveness and adverse side effects of PRN pain medications was documented.</p> <p>10. A review of the QA meetings, dated 05/20/15, 05/21/15 and 05/22/15, revealed the agenda regarded concerns with the allegation deficiencies as well as the annual survey deficiencies, complaint, and facility self-reported complaints. The meeting was attended by the Administrator, DON, Activities Director, MDS Coordinator, Business Office Manager, Dietary Services Manager, Medical Records, Housekeeping and Maintenance and the Marketing Manager. Interview with the Medical Clinical Officer (MCO) revealed the Medical Director attended the 05/18/15 meeting, by phone and was kept abreast of any concerns and the meetings were to continue weekly, then monthly until resolved.</p>	F 514
