

Treating Tobacco Use & Dependence in Patients with Diabetes: Incorporating D-A-A-R-T into Your Practice

This **FREE** educational program is available by **WEBCAST** which can be accessed on your own computer at your convenience

Course Description

This is an educational program to provide health professionals and specifically diabetes educators with the latest knowledge, available tools or services and a brief 3 step approach (Ask- Advise - Refer) to assist their diabetes patients to quit smoking

Approved for **2.4 Contact Hours** for Nursing

This course will help equip diabetes educators to play an important role in increasing quit line referrals, increasing patient quit attempts, reducing tobacco use and ultimately improving the health status among individuals with diabetes.

Sponsored by the Kentucky Diabetes Prevention & Control Program & the Kentucky Tobacco Prevention & Cessation Program.
