

# SAVE THE DATE

## Infection Prevention and Control in Kentucky: **Competent Practice**

**Please Note** the date of this conference has changed to December 4-5, 2012 due to speaker and vendor availability.

December 4-5, 2012 ● Center for Rural Development ● Somerset, Kentucky

This two-day course was developed by stakeholders in Infection Prevention around Kentucky. The program builds on the core knowledge shared during the 2011 Infection Prevention Boot Camp.

The target audience includes infection preventionists, chief nursing officers, quality improvement and patient safety personnel from all types of health care systems including hospitals, health departments, long-term care, ambulatory surgery and other providers.

### Training Goals

- Identify specific areas of practice critical for core competence in infection prevention practices
- Demonstrate practice competence through hands-on skills application
- Apply surveillance definitions in routine practice as well as during outbreak investigations
- Explore inter-professional collaboration necessary for competent infection prevention practices

The full brochure and agenda will be available soon. Information will also be available at <http://info.kyha.com/InfectionPrevention/home.htm>.
