KENTUCKY ANNUAL HOSPICE SERVICES REPORT

INTRODUCTION

The Kentucky Department for Public Health announces the release of the 2002 Kentucky Annual Hospice Report. The Health Policy Development Branch, Division of Epidemiology and Health Planning, is responsible for the hospice utilization data collection and reporting set forth in 902 KAR 20:008, (rev. 7-16-01). The 2002 Hospice report is the most recent official hospice data published by the Cabinet for Health Services.

This report covers the period from January 1, 2002 to December 31, 2002 for all Kentucky hospice programs. In addition, the 2002 Kentucky Annual Hospice Report highlights state hospice services and populations between the years of 1995-2002. The first edition of the annual report was in 1995.

2002 Hospice Report Summary:

There were 12,101 hospice patients served in 2002, compared to 11,660 in calendar year 2001. This represents a 3.8% increase in hospice patients served between year 2001 and 2002.

In calendar year 2002, there were 10,446 admissions compared to 9,862 admissions in 2001 (5.9% increase).

In 2002, cancer accounted for 76.4% of all in-hospice deaths, as opposed to 62.4% in 2001. There were 9,316 total hospice deaths in 2002, compared to 8,661 hospice deaths in calendar year 2001, a 7.6% increase.

Hospital Discharges To Hospice

According to hospital discharge data collected by the Kentucky Department for Public Health (Health Policy Development Branch), there were 1,685 Kentucky residents discharged from Kentucky hospitals to an in-state hospice service in 2002. In 2001 there were 1,495 such discharges. Therefore, the data shows an 11.3% increase in discharges to hospice in 2002. Of these calendar year 2002 discharges, 889 were females (52.7 %) and 796 were males (47.2%).

Also, in 2002, these patients accounted for 13,556 hospital inpatient days, compared to 11,608 days in 2001. The average length of stay for patients was eight days. This compares with an average length of stay of five days for all hospitalized patients regardless of discharge. The average age of these hospital patients was 71.4 years of age.

Definitions:

ADD: Area Development District

Patients Served: Number of persons who received a service through a hospice provider. For example, with social worker visits, an individual or family may receive services without being an actual hospice patient.

Admissions: Persons admitted to hospice services. A physician has referred these persons, life expectancy is months or less.

The Kentucky Department for Public Health provides online versions of the Kentucky Annual Hospice Report. We hope you will find the information contained in our reports to be informative and easy to navigate. This 2002 report is available on-line at: <http://publichealth.state.ky.us/data-warehouse.html>
