KENTUCKY ANNUAL HOSPICE SERVICES REPORT

INTRODUCTION

The Kentucky Department for Public Health announces the release of the 2003 Kentucky Annual Hospice Report. The Health Policy Development Branch, Division of Epidemiology and Health Planning, is responsible for the hospice utilization data collection and reporting set forth in 902 KAR 20:008, (rev. 7-16-01). The 2003 Hospice report is the most recent official hospice data published by the Cabinet for Health Services.

This report covers the period from January 1, 2003 to December 31, 2003 for all Kentucky hospice programs. In addition, the 2003 Kentucky Annual Hospice Report highlights state hospice services and populations between the years of 1995-2003. The first edition of the annual report was in 1995.

2003 Hospice Report Summary:

There were 12,237 hospice patients served in 2003, compared to 12,113 in calendar year 2002. This represents a 1.0% increase in hospice patients served between year 2002 and 2003.

In calendar year 2003, there were 10,281 admissions compared to 10,458 admissions in 2002 (2.0% decrease).

In 2003, cancer accounted for 58.0% of all in-hospice deaths, as opposed to 59.9% in 2002. There were 9,155 total hospice deaths in 2003, compared to 9,326 hospice deaths in calendar year 2002, a 1.8% increase.

Hospital Discharges To Hospice

According to hospital discharge data collected by the Kentucky Department for Public Health (Health Policy Development Branch), there were 2,371 Kentucky residents discharged from Kentucky hospitals to an in-state hospice service in 2003. In 2002 there were 1,685 such discharges. Therefore, the data shows a 40.7% increase in discharges to hospice in 2003. Of these calendar year 2003 discharges, 1,601 were females (67.5 %) and 1,307 were males (55.1%).

Also, in 2003, these patients accounted for 23,841 hospital inpatient days, compared to 13,556 days in 2002. The average length of stay for patients was 8.2 days. The average age of these hospital patients was 71.1 years of age. This compares with an average length of stay of 4.7 days for all hospitalized patients regardless of discharge status.

Definitions:

ADD: Area Development District

Patients Served: Number of persons who received a service through a hospice provider. For example, with social worker visits, an individual or family may receive services without being an actual hospice patient.

Admissions: Persons admitted to hospice services. A physician has referred these persons, life expectancy is six months or less.

The Kentucky Department for Public Health provides online versions of the Kentucky Annual Hospice Report. We hope you will find the information contained in our reports to be informative and easy to navigate. This 2003 report is available on-line at: <http://publichealth.state.ky.us/data-warehouse.html>
