### Gov. Beshear: Virus Continues to Surge Across Commonwealth

**FRANKFORT, Ky. (Nov. 3, 2020)** – On Tuesday, Gov. Andy Beshear said Kentuckians should be alarmed by the surge of COVID-19 cases in the commonwealth and renew their commitment to stop the spread of this disease before the crisis escalates further.

“It continues to be a difficult time in the commonwealth, where every day, things appear to be getting worse and more concerning,” said Gov. Beshear. “We are seeing not only a surge in the virus, but more and more of our kids by percentage who are getting it.”

Families, schools, businesses and community leaders in counties [listed in the red zone](#) should follow [nine recommendations](#) to keep people safe. All Kentuckians should consider adopting some of these recommendations to help their county avoid the red zone. Today’s COVID-19 case report is the highest ever for a Tuesday.

He encouraged all Kentuckians to vote safely and make their voices heard today.

“I think Kentuckians are really focused on what appears to be a record turnout. I believe this election will be one that is good for democracy and shows that Kentucky can be a model for the country,” said Gov. Beshear.

### **Case Information**

As of 4 p.m. Tuesday, Nov. 3, Gov. Beshear reported the following COVID-19 numbers:

- New cases today: 1,795
- New deaths today: 11
