

# Quick Response Teams

## Kentucky Opioid Response Effort

An innovative, free mobile outreach effort designed to reach KY's most vulnerable populations within 24-72 hours after experiencing an overdose or substance-related crisis

### Outreach

Assertive outreach to overdose survivors and families. QRTs also take self-referral and referrals by community partners such as first responders.

### Follow up

Follow-up phone calls and home visits within 24-72 hours of crisis. QRTs can include peer support, first responders, treatment providers, law enforcement, and other community partners.

### Compassion

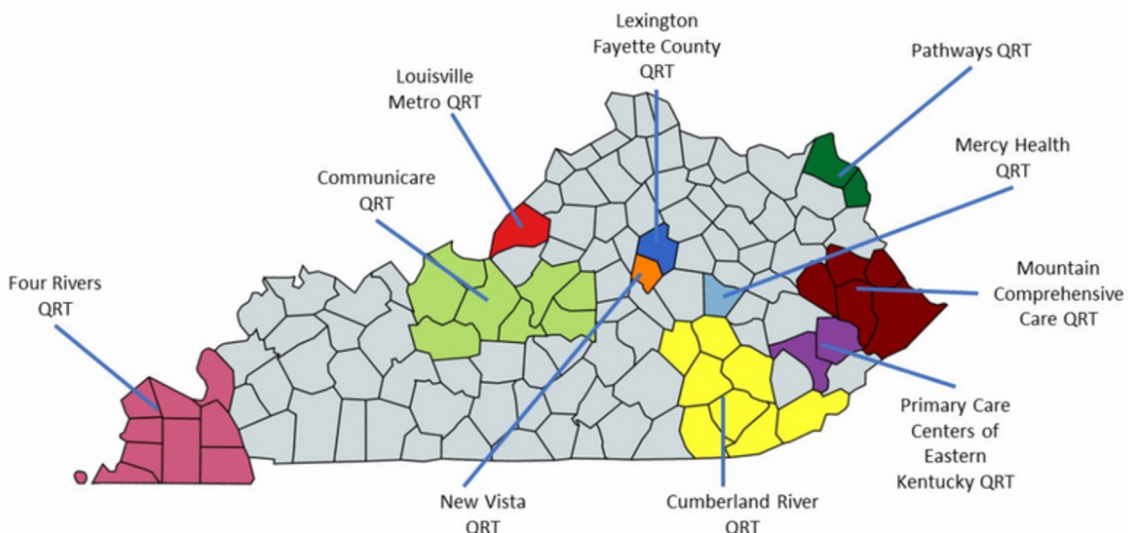

Centered on the survivor's needs, the message is: "We care and we are here for you." QRTs meet people where they are.

### Services

Provide linkage to treatment, harm reduction, recovery, or needed community services.
