## ABOUT THE ORGANIZATION & PROGRAMS

Child Care Aware of Kentucky is the statewide regional network for Child Care Resource and Referral (CCR&R) services supporting access to safe, affordable, quality child care for families and professional development for child care providers and trainers.

Child Care Aware of Kentucky is housed at the Human Development Institute at the University of Kentucky. The Human Development Institute is Kentucky's University Center for Excellence in Developmental Disabilities Education, Research and Service. Projects focus on improving lifelong opportunities and services for individuals with disabilities, their families, and the community.

This report was developed in part with Child Care and Development Block Grant funds through a contract to the Human Development Institute from the Kentucky Cabinet for Health and Family Services, Division of Child Care (Contract Number PON2 736 2200001723).

## The Cost of Care in Kentucky

### Part 1: 2024 Child Care Market Rate Survey

This Market Rate Survey has been conducted in support of the Kentucky Cabinet for Health and Family Services, Division of Child Care (DCC), as required by the Child Care and Development Fund (CCDF) Final Rule. This study provides data to inform the provision of Child Care and Development Block Grant (CCDBG) subsidies that are sufficient to ensure that eligible children have the same access as non-eligible children to child care spots. The federal benchmark for equal access is the 75<sup>th</sup> percentile. However, as is the policy of DCC for calculating Child Care Assistance Program (CCAP) subsidies, market rates are calculated at the 80<sup>th</sup> percentile.

This report details the data collection process and participation rates among all providers. In addition, geographic variations are detailed in full so that comparison of full-time and part-time rates can be made by geographic variation including region of the state, Child Care Aware (CCA) region, and urban/rural differences. These county divisions are detailed in Tables A-C. We also examine differences between providers who accept CCAP child care subsidies, and those who rely solely on private pay. Additionally, our study looks at differences based on quality level (High Quality vs. Regulatory Compliance).

This report is the first phase of the larger Cost of Care in Kentucky research study. This report provides the requested 80<sup>th</sup> percentile baseline to inform DCC and early childhood stakeholders with accurate price data across the state. These percentiles are provided by the following age groups: infant, toddler, preschool, and school age.

Additional data collected at the same time included responses from some providers regarding their costs to provide care. These data will be used to model costs to providers in part two of this project.

## Data Collection

All providers in the regulated, priced child care market were invited to participate. Data were collected from January 16 through February 14, 2024 in order to provide current and contemporaneous information on child care across the state. The three types of regulated providers in Kentucky, Licensed Type I and Type II Centers, and Certified Family Child Care Homes, were included.

Email addresses from the January 2024 active provider list were used to send personalized invitations and an automated scheduled reminder to complete the survey one week after launch. All participants were required to review a consent form and agree to participate before completing the online survey and submitting their rates.

Notices were placed on social media, messages were sent by the DCC ListServ, and technical assistance staff reminded providers that the survey was available. As an additional incentive, a random drawing for one of three \$100 training credits was included to any provider who completed the survey. Those providers who did not receive or could not find the invitation link because of spam filters or other technical issues, also had the opportunity to submit a survey with a generic link once the scheduled reminder period passed. During data cleaning, surveys were matched to the original list to ensure that there were no duplications.

The overall response rate to the survey was 57.16%. See Table 1 for survey response rate by provider type. See Table 2 for response rate by CCA region.

## Geographic Differences

Market rates by child's age were first calculated statewide and then geographically. See full-time rates in Table 3 and part-time rates in Table 4 by geographic region. See full-time rates by CCA Region in Table 5 and part-time rates by CCA Region in Table 6.

### Urban vs. Rural Status

Although most counties in Kentucky are designated as rural, the urban population is 58.7% according to the 2020 U.S. Census. Rates by urban/rural status are detailed in Table 7 for full-time and Table 8 for part-time.

### Subsidy Acceptance

The population examined in this study (all providers included in the January 2024 lists) indicates that the majority are willing to accept CCAP child care subsidies. 82.51% of licensed centers and 89.95% of certified child care homes are listed as able to accept CCAP. The differences in market rates by subsidy acceptance are detailed in Tables 9 – 12.

### Quality Levels

Improving parents' access to quality child care is a central goal of CCDBG grant. The following tables (13-16) examine rates by quality as defined by Kentucky All STARS ratings. Comparisons are made based on market rate between High Quality (All STARS Level 3-5) and Regulatory Compliance (All STARS Level 1-2).

These market rates are provided to inform DCC as they look at setting subsidy rates. In addition, these rates can be utilized as business information to providers as they set their own rates based on the market in their area. The research team will also be using this market rate information as a baseline to examine the providers’ costs of child care in part two of this project.
