A P P E A R A N C E S

TAC Members:

Steve Shannon, Chair
James Daley (not present)
Shawn Ryan (not present)
Shannon Smith-Stephens (not present)
Brandon Harley
Adrienne Bush
Van Ingram
Casey Michalovic
Kristen Porter
Kevin Sharkey (not present)
Angela Darcy (not present)
Nathan Thomas

1 MR. SHANNON: Good morning. How
2 are you, Erin?

3 MS. BICKERS: Good morning. I
4 am well. How are you?

5 Good morning. This is Erin with
6 the Department of Medicaid. It is not
7 quite 9 o'clock and we will give it just a
8 few minutes while we clear out the waiting
9 room.

10 So far I have Kristen, Steve,
11 and Nathan on. If I missed any TAC
12 members while they were logging in, please
13 just let me know.

14 MS. PORTER: Steve, this is
15 Kristen. I wanted to let you know that I
16 will have my camera on at the beginning
17 when we are voting and doing the minutes
18 and all of that, but I will have to be off
19 camera for the rest of the meeting. I am
20 going to be driving from one location to
21 another so I just wanted to give you a
22 heads up.

23 MR. SHANNON: No worries.

24 MS. BICKERS: Good morning,
25 everyone. It is now officially 9 o'clock.

1 I have Steve, Brandon, Van, Casey,
2 Kristen, and Nathan. Did I miss any
3 members logging in?

4 MR. SHANNON: I think that's it.

5 MS. BICKERS: We need one more
6 for a quorum so I will keep an eye out
7 while the waiting room clears out.

8 MR. SHANNON: Okay. Let's go
9 ahead and get started.

10 MS. BICKERS: Here comes
11 Adrienne so now you should have a quorum.

12 MR. SHANNON: Okay. We have a
13 quorum. I appreciate that.

14 The minutes were sent out from
15 the November meeting. Can we get a motion
16 to approve the minutes?

17 MR. HARVEY: This is Brandon.
18 So moved.

19 MR. SHANNON: Thank you,
20 Brandon.

21 MR. INGRAM: This is Van. I
22 will second.

23 MR. SHANNON: All in favor say,
24 "aye."

25 TAC MEMBERS: Aye.

1 MR. SHANNON: Opposed and nay?

2 So we have the minutes approved. Thank
3 you for that. Appreciate it.

4 I saw Angela Sparrow somewhere.

5 Anyway, Medicaid update. Is
6 that you, Angela?

7 MS. SPARROW: Yes, Steve, it is
8 me. Good morning, everybody.

9 MR. SHANNON: How are you.

10 MS. SPARROW: I'm good. It
11 looks like a few of you all might be
12 traveling this morning, which I am glad
13 that we have had some warmer, nicer days
14 to be out and about. So those things we
15 take as a win. So again, it is good to
16 see.

17 Just to provide some updates
18 around the 1115 re-entry demonstration.
19 Again, a great deal of work continues to
20 occur as we move forward in the progress
21 and implementation progress.

22 Again, we have not heard
23 anything back from CMS, just so everybody
24 is aware, around the deliverables that we
25 submitted last fall, so the implementation

1 plan or monitoring protocol reinvestment
2 plan, we haven't heard any response, which
3 isn't abnormal. And so, again, we have
4 communicated some questions and have
5 received some responses, but specifically
6 around those documents, again, just no
7 feedback at this time.

8 MR. SHANNON: It is my
9 understanding that they might be a bit
10 distracted in DC.

11 MS. SPARROW: Yes, yes. Again,
12 they reassure us that they will let us
13 know if they have any questions or need
14 anything or if they have any feedback.
15 But we do keep that on the radar and on
16 the agenda to ask.

17 We are continuing our work
18 groups with DOC and DJJ. Again, really
19 around some of those policy procedures.
20 And what implementation will look like
21 doing some of those program design
22 sessions. We have kind of kicked off
23 again, pharmacy work group looking at the
24 30-day supply of medications at the time
25 that the individuals are released. So we

1 are working, again, with DOC and DJJ
2 pharmacy vendor on that as well and part
3 of those discussions. Our pharmacy team
4 within DMS to also help guide those
5 discussions so, again, kind of keep
6 hearing the formularies. If there are any
7 concerns there, how are they aligning.

8 Addressing that, again, how are
9 we notifying the vendor of there now,
10 again, reimbursable medications for
11 Medicaid. What are those system changes?
12 So all of those conversations continue to
13 occur.

14 We, again, are -- with that
15 being said, drafting requirements for
16 system changes. So for example, there
17 will be changes that we will need to make
18 through our eligibility system. So how
19 are we identifying the re-entry
20 population, the CA population eligible for
21 these services in that pre-release time
22 frame. So again, having those
23 discussions, kind of walking through those
24 options, and what that can look like. And
25 again --

1 MR. INGRAM: Angela, can I ask
2 you a question?

3 MS. SPARROW: Mm-hmm.

4 MR. INGRAM: In that meeting we
5 were in yesterday, they were discussing
6 aged out foster youth age 18 to 26 and how
7 they could identify those and verify that
8 that was the case. Is that an issue for
9 us?

10 MS. SPARROW: No. It is the
11 same for all states, Van. The former
12 foster care youth, they do self attest so
13 that is in the same and that has been the
14 case, so we do capture that on the
15 Medicaid application and during that
16 process, that is something that our
17 correctional partners have not typically
18 captured so, again, that is part of that
19 work in some of those changes to make
20 amendments to that process of asking that
21 information, again, through that
22 eligibility screening process, that that
23 is apart of that. So something that the
24 correctional facilities do not currently
25 know so that is something for those who

1 are currently eligible for services, we
2 kind of have to go back and verify
3 eligibility and if they were part of
4 former foster care. So those will be part
5 of the changes that will be reincorporated
6 with the re-entry implementation that that
7 is part of the process.

8 But yes, so those are the system
9 changes. Those changes are being
10 discussed, again, drafting those
11 requirements so that would be the
12 eligibility system the MMIS billing
13 claiming system, MedImpact with their
14 pharmacy.

15 So again, lots of systems that
16 we know within Medicaid, but not just,
17 again, within Medicaid but with our
18 correctional partners. So again, working
19 with them on all of those pieces and,
20 again, pulling in MCOs and the changes,
21 again, are certainly going to have an
22 impact to their systems as well so, again,
23 working on drafting those requirements for
24 those discussions.

25 Again, along with the MCOs,

1 taking off some workgroup sessions with
2 MCOs and, again, around requirements and
3 expectations, case management, kind of
4 drafting out that case management service.
5 So those we have had some kind of
6 preliminary discussions, but that
7 workgroup, I think, is kicking off next
8 week and then pulling them in with some of
9 the other discussions with DOC and DJJ.

10 We, again, also continue to work
11 with Mercer, so just want to continue to
12 get their name out there who is the
13 independent evaluator of the demonstration
14 and, again, their evaluation design, so
15 how, again, are they going to assess
16 monitor the program and so, again, many of
17 you all in some of the other forums --
18 KORE team, ACRES group, you will see that
19 they are going to start being a part of
20 those kind of just listening and getting a
21 feel for the program, for the partners
22 and, again, what is the plan for
23 implementation.

24 So again, continue to work with
25 Mercer on that and what that looks like.

1 We do, again, continue to participate in
2 the NASHP learning collaborative, which is
3 a good opportunity to learn from other
4 states.

5 Certainly, many of these
6 discussions are happening across the
7 nation and so they are having the same
8 questions that we are having. Some are in
9 different spots in implementation, and
10 some are just beginning.

11 So again, just having that
12 opportunity in that space to hear from
13 other states is important to get ideas and
14 lessons learned back to the table as well.

15 I am going to pause. There has
16 been a lot going on and will continue go
17 to go on.

18 Again, we will continue to work
19 through this quarter and next quarter and
20 really some of those design decisions that
21 still need to be made, system changes, and
22 then hopefully work towards more of those
23 deployment of changes, readiness through
24 the summer into fall implementation.

25 Any questions?

1 MR. SHANNON: Yes. I just want
2 to cover this. The re-entry population,
3 are they eligible as a standalone or are
4 they part of the expansion population?

5 MS. SPARROW: I think, again,
6 the re-entry 1115 -- that population can
7 be a combination of expansion or anyone.

8 So again, it is not just the
9 expansion populations.

10 MR. SHANNON: Okay. The reason
11 that I ask is because legislation there is
12 a community engagement requirement for
13 that population -- or will be -- and how
14 that impacts this and (2), obviously,
15 there is all sorts of speculation that
16 happens at the federal level and is the
17 expansion population -- that match rate,
18 target, things like that -- will that have
19 a negative impact on some folks who could
20 participate in this.

21 We are hoping no, but I don't
22 think we know that and I know the complete
23 engagement piece will be a requirement and
24 one was that shouldn't be a big challenge
25 I don't think, but I do believe that that

1 is going to be something that we have to
2 pay attention to.

3 MS. SPARROW: Agreed. Those are
4 all things that we will continue to
5 monitor, but as you mentioned, lots of
6 speculations, but nothing definite and no
7 changes have been made as of today, so
8 certainly, we will continue to monitor,
9 but, yes, what any of those impacts could
10 be.

11 MR. SHANNON: Are there
12 questions folks from anybody?

13 MS. SPARROW: I did forget to
14 mention that it wasn't specifically to the
15 re-entry 1115, but part of re-entry
16 initiatives around CAA.

17 Again, I think we had touched
18 some on -- but again, we are also
19 beginning to have interviews with local
20 jails around the CAA population and
21 requirements. So again, we had completed
22 the initial survey and had received a
23 response from over half of the jails which
24 was great, and again, we will continue to
25 give DOC lots of credit and support there

1 in facilitating those responses and
2 connecting us.

3 So we are also conducting
4 one-on-one interviews with jails who did
5 not respond to that survey so we can get,
6 again, more granular into those survey
7 results, information, and again, trying to
8 determine how they align with CAA
9 requirements, where they are, and again,
10 kind of being able to move forward and how
11 to onboard the jails.

12 But in a part of those
13 interviews we are asking some questions
14 around the re-entry services so that we
15 can better know and prepare for any
16 potential expansion in the future, so
17 again, taking advantage of that
18 opportunity as we start those
19 conversations and open up those channels
20 with those facilities.

21 We have had a handful of those
22 interviews and those will continue through
23 the end of March and probably into
24 mid-April.

25 The ones that we have spoke to

1 so far, again, have been receptive in
2 talking with us and, again, sharing
3 information and wanting to know more about
4 the CAA requirements and projects. So
5 good things there.

6 MR. SHANNON: If there are no
7 questions, let's move on to Hepatitis C
8 treatment update. Anything new or still
9 having more discussions?

10 MS. SPARROW: Correct. No new
11 updates. I think that that could probably
12 play into those case management
13 discussions. I think.

14 MR. SHANNON: Taking notes.

15 House Bill 789 creates them.
16 Changes in the creation of the Beneficiary
17 Advisory Council. It doesn't look like it
18 is going anywhere. Discussion of that?

19 As I understand, the Beneficiary
20 Advisory Council is a federal requirement.
21 There is some question about whether or
22 not that will be maintained or not, but
23 for folks on the call, the MAC is the
24 Medicaid Advisory Council. This is a
25 council made up of beneficiaries, family

1 members, or representatives. I understand
2 the composition of it and over time, a
3 third of the Medicaid Advisory Council
4 members will also be BAC members to focus
5 on the beneficiary piece of it.

6 I just didn't know if there was
7 an update, Angela, or someone else, but
8 the bill hasn't gone anywhere, which tells
9 me that in the means of legislation to
10 make changes to the MAC, the BAC -- the
11 Beneficiary Advisory Council -- doesn't
12 need legislation, necessarily. But I have
13 heard what it looks like that maybe, it
14 was a final rule that was issued at some
15 point, and they may be rescinded,
16 obviously, or it could be, but we haven't
17 heard that. You are not involved in those
18 discussions.

19 MS. SPARROW: No. Again, not
20 directly, but those are all of the things
21 that we continue to monitor both at state
22 and federal at this time, so any of those.
23 But again, most of these are speculations
24 and there have been no definite changes.
25 So all of those things continue to be

1
2
3
4
5
6
7
8
9
10
11
12
13
14
15
16
17
18
19
20
21
22
23
24
25

monitored.

MR. SHANNON: And the bill didn't go anywhere, which tells me that somebody doesn't think it is necessary to maintain, because I think the BAC right now -- I don't know if the start date is required, but it sounds that may change and other folks have said that they don't know that that is going to be a requirement.

Any questions for Angela?

Let's go to MCO updates.

MS. BICKERS: Steve, Jonathan Scott is hopping on if you wanted to ask your MAC/BAC question again.

Sorry, Stuart, I didn't mean to cut you off.

MR. OWEN: No, you're fine.

MR. SHANNON: Yes. Is Jonathan on?

MR. OWEN: I was wondering about House Bill 789 too, Steve. I think it is 7/1/25 is when the BAC has to be running so if the legislator is not moving then what is the problem, here?

1 MR. SHANNON: BAC can be done
2 through a regulation. Change to the MAC
3 cannot be because that is a statute. So
4 those changes -- but going forward the MAC
5 can be done through a regulation.

6 MS. BICKERS: And Jonathan has
7 joined us.

8 MR. SHANNON: Jonathan Scott?

9 MR. SCOTT: Good morning. Sorry
10 about that.

11 MR. SHANNON: How are you, sir?

12 MR. SCOTT: Good.

13 MR. SHANNON: We have MAC/BAC
14 questions.

15 MR. SCOTT: All right.

16 MR. SHANNON: 789, that is not
17 going anywhere, obviously. What are the
18 ramifications of that and where are we at?

19 MR. SCOTT: We are still
20 evaluating what is going to happen with
21 789 and don't really have a final update
22 or anything like that at this point. We
23 are just going to, you know, see what has
24 happened at the end of this week and then,
25 again, at the end of session, and then we

1 will go forward and see what options are
2 on the table with everything.

3 MR. SHANNON: It could be added
4 to something that is about to pass if
5 there was an appetite to do that, right?

6 MR. SCOTT: Right. So that is
7 still a possibility.

8 MR. SHANNON: And I just told
9 folks -- and I think somebody else said --
10 that the BAC can be done through
11 regulation, but changes to the MAC can't
12 be; is that correct?

13 MR. SCOTT: Again, I don't have
14 an update on that. I can't comment as to
15 that.

16 MR. SHANNON: All right.
17 Appreciated.

18 MR. SCOTT: Good deal. Thank
19 you.

20 MR. SHANNON: All right, Stuart,
21 now we can get to MCO updates.

22 MR. OWEN: Good morning, Steve.

23 MR. SHANNON: Good morning, sir.

24 MR. OWEN: Not a lot of major
25 updates, but it is significant that our

1 care management team has this year been
2 receiving a higher volume of referrals
3 from individuals being discharged from
4 incarceration. We have had five so far
5 this year, and in the past it seems like
6 it would be about one per month or one
7 every other month, so that is positive.

8 And I do have just a little
9 member success story that I would like to
10 share. It's a 35-year-old female, and we
11 were notified in January, within two days
12 our care management team was able to
13 engage with her.

14 She has cervical cancer and is
15 just 35 years old, but she was released to
16 her grandmother. She is living with her
17 grandmother helping take care of her
18 grandmother, but anyway, our care
19 management team engaged with her and
20 showed her all of the different
21 value-added benefits and how to access
22 them.

23 She already had an oncologist
24 lined up for the cancer treatment, but she
25 did not have a PCP or a dentist and she

1 particularly had dentist needs so the care
2 management team helped her, you know, hook
3 up with the PCP and dentist, offered to
4 make the appointments for her. She didn't
5 want that, but they stayed in touch with
6 her. She also had some need for some
7 durable medical equipment items related to
8 the cancer and so the care management team
9 helped her obtain all of that stuff that
10 she needed. And they've continued to stay
11 in touch with her to make sure that she's
12 going to her oncology appointments and
13 offering, you know, continued assistance
14 to her.

15 Anyway, I just like to share
16 that. Again, the volume is a little bit
17 higher now, I'm not exactly sure why, but
18 that is positive.

19 That is our WellCare update.

20 MR. SHANNON: All right. Thank
21 you.

22 United?

23 MS. MILBURN: Good morning.

24 This is Liz Milburn from United
25 Healthcare.

1 I agree with Stuart. We have
2 had two referrals thus far from the state,
3 which has definitely increased in volume
4 for us as well. We have some internal
5 data too, as well, that we are using as
6 well to get connected to folks from
7 incarceration. We successfully reached
8 200 of them and (audio interruption)
9 agreed to case management.

10 MR. SHANNON: You are breaking
11 up there.

12 Are you back?

13 MS. BICKERS: I think we may
14 have lost her. All right. We can go back
15 if she joined us.

16 Passport?

17 MR. ZAKEM: Hey, it is Mark
18 Zakem from Passport. We are also
19 receiving, again, some referrals through
20 the pilot. I know the most recent one was
21 engaged in case management. I don't have
22 any other details about that.

23 Otherwise, our community
24 engagement is doing what they are always
25 doing, they do seem to be doing more of

1 it. They have had 14 live events and 14
2 virtual events since the beginning of the
3 year. They've got, I think, five more to
4 go this month. Live and virtual events
5 have been mainly re-entry meetings, but
6 the live events are pre-release meetings
7 and classes, the hiring fares, expungement
8 clinics. I think there was one re-entry
9 simulator that they were involved with.
10 And virtual re-entry council meetings as
11 well.

12 We are also beginning to use our
13 own data to identify folks and set up a
14 program for them. We will probably have a
15 few who have been incarcerated and will
16 certainly have more information about that
17 at the next meeting. And that is our
18 update.

19 MR. SHANNON: Thank you.

20 Any questions? We appreciate
21 it, Mark.

22 Humana?

23 MS. BENDORF: Good morning.

24 This is Kelly Bendorf from Humana. I also
25 have just a few quick updates.

1 Like the other MCOs, we've
2 actually had a huge increase in quarter
3 1 of our management program. We have had
4 nine members released, which is, like I
5 said, a huge increase from 2024.

6 We have actually been able to
7 reach most of these members which is
8 really exciting and they are all doing
9 well and have a lot of support already in
10 place, so that is great news for our
11 re-entry program.

12 As for our community engagement
13 team, they have also been really busy with
14 events around Kentucky to support our
15 members re-entering society. They've
16 attended re-entry classes at several
17 facilities, which include Kentucky
18 Correctional Institution for Women, Luther
19 Lockett, Kentucky State Reformatory,
20 Roederer, Larue Detention Center.

21 Our team actually attended an
22 expungement clinic in Hopkinsville and
23 have plans to attend one in Somerset
24 tomorrow, as well as the Goodwill in
25 Louisville later this month.

1 Lastly, they attended TENCO
2 partner meeting for re-entry on February
3 6th, a dental clinic at St. John's Shelter
4 on February 24th, Women's Healing Place on
5 February 28th and the Commitment Path on
6 March 5th. So we have lots of good things
7 happening in the community.

8 That is all I have. Thank you.

9 MR. SHANNON: Thank you. Good
10 stuff.

11 Any questions? All right.

12 Aetna?

13 MS. HAM: Good morning. This is
14 Courtney Ham with Aetna.

15 We at Aetna, or SKY is the
16 supporting foster care contract, so we are
17 busily readying ourselves for an influx of
18 that, so we are doing staff education as
19 well as outside education.

20 We have -- I have personally
21 attended virtual re-entry meetings as well
22 as being involved in those discussions
23 with DJJ, but I do have a couple
24 colleagues on here -- I don't know if Lana
25 wanted to mention any of the members that

1
2
3
4
5

18
19
20
21
22
23
24
25

she has been working with.

MS. BECKIM: Yes, thank you,
Courtney. This is Lana.

We have received also more
referrals. We have received five so that
is excellent. And we also have been using
our own data and able to find members
within Aetna who have been incarcerated
and we have been able to connect with
them.

I have also attended some
re-entry meetings. I have been in the
community so everything is going really
good.

MS. HAM: Just for a reminder,
Lana is our dedicated re-entry manager so
we have that in place for the adult side
and we are working diligently on the other
side so I just wanted to give you that
update.

MR. SHANNON: Any questions? I
appreciated the reports.

MS. MILBURN: Can United have
another try? I am back and rejoined.

MR. SHANNON: Hello. How are

1 you?

2 MS. MILBURN: Good. All right.

3 So Liz Milburn from United.

4 Thus far, we have had two
5 referrals from the state, and both we have
6 been unable to reach, but we have internal
7 data and we have successfully reached 200
8 of those members and 93 have agreed to
9 case management, so our numbers are
10 looking good and we are connecting folks.

11 MR. SHANNON: Thank you.

12 MS. MILBURN: Thank you.

13 MR. SHANNON: Big change. I
14 mean, it's increasing numbers already.
15 That's digital communication and the work
16 that's been applying with our MCO partners
17 and Angela Sparrow and her Medicaid team,
18 and folks working on this. There is
19 obviously more talk about it becoming more
20 available and before it is approved,
21 there's a lot being made. So that is
22 encouraging. I appreciate that.

23 MS. LIBBY: I have a quick
24 question.

25 MR. SHANNON: Yes.

1 MS. LIBBY: Several of the MCOs
2 mentioned the different events that they
3 either have going on or they have been
4 attending. I was just curious if there is
5 a place, what would be the best place to
6 figure out more about those events and
7 adjust the social media pages, or if there
8 are places on the website, or if there is
9 currently another central organization to
10 find out about community events like that
11 for each MCO.

12 MR. SHANNON: Good question.
13 Is there a place that people can
14 go to?

15 MS. PORTER: So let me -- Steve,
16 this is Kristen Porter.

17 Let me answer for the Department
18 of Corrections and then the MCOs can
19 answer for themselves, too.

20 For the Department of
21 Corrections, the ones that we partner with
22 the MCOs to host, we provide -- if you go
23 to the Kentucky Department of Corrections
24 website, under the re-entry page, there is
25 a tab on there that lists when community

1 events are, and it lists the location and
2 the date and where they will be and all of
3 that. You can look on there for the ones
4 that we are a part of.

5 I know that some of the MCOs do
6 them on their own, too, so I won't speak
7 for them on everything else that they are
8 doing, but we can see -- you can see the
9 ones that we are involved with in that
10 way.

11 MR. SHANNON: Thank you,
12 Kristen.

13 Any of the MCOs? Do you have a
14 page where they are listed, your events?

15 MR. OWEN: Steve, this is Stuart
16 with WellCare, and I am scrambling and
17 pinging our community engagement team.

18 I do know on social media, we
19 post stuff like that. I don't know that
20 it is on our -- all of us have member-only
21 pages, but I'm not sure if we post it
22 there. I'm trying to find out, but I
23 don't know right now for certain.

24 MR. ZAKEM: It is Mark from
25 Passport. I am putting a link in the chat

1 where folks can go for Passport
2 information.

3 MR. SHANNON: There it is. And
4 Angela posted the DOC link as well.

5 Anybody else?

6 MS. GARDNER: My name is Katie
7 Gardner. I am with the viral hepatitis
8 program at the Kentucky Department for
9 Public Health.

10 I just had a question for the
11 MCOs, just kind of a general question, and
12 also I want to respect if there are other
13 folks who have to come off mute to talk
14 about the events that they are having. So
15 I just wanted to give some respect for
16 that.

17 Hearing none, I was just
18 wondering, there is a high prevalence of
19 people with Hepatitis C among people who
20 have been incarcerated, obviously. Is
21 connecting people who are released from
22 incarceration to Hep C testing and
23 treatment, is that a specific part of the
24 case management? Like, is that sort of on
25 a checklist, like, this is something that

1 we know, you know, unfortunately a lot of
2 people are not getting treated while they
3 are incarcerated, but when they are
4 released, when they are connected to
5 health insurance is a great time to start
6 thinking about that. I was just wondering
7 if that was a specific part of that
8 process.

9 MR. SHANNON: Anybody?

10 MS. MILBURN: This is Liz
11 Milburn from United. That is part of our
12 assessment when we are completing an
13 assessment with the members and talk to
14 them, we address those issues as well, and
15 then we would, furthermore, if they did,
16 say they were positive for Hep C, then we
17 would link them to providers in the
18 community to provide treatment.

19 MS. BENDORF: This is Kelly with
20 Humana.

21 It would be the same for us as
22 well. We do extremely thorough
23 assessments with all of our members that
24 we are trying to get engaged in care
25 management, especially the ones that are

1 in this re-entry program that are
2 identified by the state so, yes, those
3 would be addressed by them.

4 MR. OWEN: And same. Stuart
5 with WellCare.

6 We do an extremely comprehensive
7 assessment. And back to the events, we
8 post on our Facebook page and our
9 Instagram page, and we also post -- our
10 members have accounts and there is a
11 member site for members, but you have to
12 have an account and alerts go there as
13 well, but most of the time an organization
14 that we are working with will advertise in
15 the community.

16 MR. ZAKEM: This is Mark from
17 Passport.

18 Ditto on the assessments. They
19 are quite thorough and there are many of
20 them, but we usually catch everything that
21 is there.

22 MS. GARDNER: That is great to
23 hear. I am just wondering, then, and I
24 understand you don't have specific numbers
25 necessarily, but wondering if there is,

1 then, success in getting people connected
2 to treatment and cure?

3 MS. HAM: This is Courtney from
4 Aetna.

5 I think that is a good take
6 away. I can't think of anything off the
7 top of my head, but when I was working
8 inside Kenton County there was a very high
9 percentage -- like 90 percent -- of the
10 clients had Hepatitis C, so I think that
11 is a good take away for Aetna if you want
12 to talk about it next time.

13 MR. SHANNON: Yes.

14 And Courtney, the take away is
15 the answer to the last question that Katie
16 Gardner asked, right?

17 MS. HAM: Sorry. I lost you.

18 MR. SHANNON: You said, "it's a
19 good take away." But I not sure that I
20 understand what the take away is. Is that
21 a follow up to treatment?

22 MS. HAM: I meant for the take
23 away that we can go back and see if there
24 are some numbers, or if there is, you
25 know, any data that we have. That is all

1 I was saying to do next time.

2 MR. SHANNON: Okay.

3 MS. MILBURN: It also will be

4 great once the re-entry program starts

5 when the case management, the MCOs are

6 able to talk to them when they are

7 incarcerated. We are able to link them --

8 and I run a program similar in Ohio where

9 we are able to link them and talk to them

10 when they are incarcerated, and know that

11 they have follow-up care afterwards.

12 MR. OWEN: Absolutely fantastic

13 point by Elizabeth.

14 MS. MILBURN: I would be

15 interested to track that.

16 MS. SPARROW: Once the 1115 is

17 implemented, and, again, that will just be

18 with the prison population. We understand

19 that the jail population is a larger

20 population, but within the prison

21 population, with the MCOs being able to

22 engage in that 60-day prerelease time

23 frame. Again, do those assessments

24 pre-release, so they are already part of

25 that assessment, doing those assessments

1 pre-release, that will be part of the
2 discussions.

3 So while the demonstration does
4 not currently cover treatment pre-release,
5 except for the MAT services, that again is
6 where we will have discussions with our
7 partners. So again, if that is identified
8 pre-release, what does that treatment look
9 like pre-release? Or again, ensuring that
10 we at least have that plan in place for
11 that at the time of release, connecting
12 them to those community partners.

13 So again, those are, I think,
14 all of the great discussions that are very
15 forthcoming in those things that we will
16 see through the implementation.

17 MS. GARDNER: That all sounds
18 great. I really appreciate all of this
19 information as well as, sort of, yes, we
20 would love any data that you have as a
21 program. If you have data about success
22 or failure or whatever, it would be great
23 for us to know how it is going connecting
24 people upon re-entry to Hepatitis C care.
25 We know that it is difficult, but we know

1 that increased case management is one way
2 to do that.

3 Also any resources that we can
4 provide, we are currently working on some
5 educational materials that we would love
6 to share with you all once they are
7 approved. Any education that we can
8 provide to the MCOs, to the case managers,
9 that is something that as a program, the
10 viral hepatitis program, the state would
11 be really happy to help with.

12 I am going to put my email in
13 the chat if anyone would like to reach
14 out. I am going to be finding you and
15 reaching out to you as well.

16 MS. PORTER: I would love to
17 have -- I have re-entry centers in all of
18 the state prisons. In those centers we
19 have, of course, resource walls,
20 basically, where we have flyers with
21 pamphlets and things like that to give
22 resources to the population when they are
23 releasing, so I would love to have copies
24 of any information that you have that we
25 can add to our resource centers.

1 MS. GARDNER: Absolutely. I
2 will definitely get that your way,
3 question. Thank you so much for that.

4 MS. PORTER: Awesome. Thank
5 you.

6 MR. SHANNON: Several comments
7 about community events that may not be
8 necessarily listed on their website and
9 folks are asking if there is place where
10 they are available and I know that Nathan
11 Thomas has posted a couple of times and he
12 is on this TAC.

13 Nathan, do you know of a
14 resource where those are posted?

15 MR. THOMAS: Well, a lot of it
16 is through social media, but I'm on
17 multiple email groups, also.

18 Every Monday on this one
19 specifically, it is generally
20 recovery-oriented, but it is not always
21 recovery-oriented. A lot of times it is
22 just community events and baseline, and we
23 post -- me and a friend of mine -- we post
24 every event that we can get a hold of
25 statewide that come up either in that

1 month or week and so on, and when we talk
2 about re-entry, a lot of people will be at
3 these events or have just left
4 incarceration or prior to -- a lot of
5 people, let's just be honest -- and the
6 experience because I have been there. I
7 do multiple resources. I can begin to,
8 possibly, if you guys would like, I can
9 find a way to forward that email. It is
10 only once a week or once a month and it
11 literally has every community event.

12 MR. SHANNON: Who sends that
13 out?

14 MR. THOMAS: Odell Hager. It's
15 called Kentucky Resource -- Kentucky
16 Outreach Resource. There is actually a
17 Facebook page. Let me see if I can find
18 it really fast. It is very easy. Yes.
19 Sorry. I am actually about to meet him.
20 Kentucky Outreach Resource is the actual
21 page. Let me see if I can find my link
22 for it and when it comes out. We do it
23 every Monday. I am trying to find a link.
24 I can email the link for the Facebook
25 page, specifically, once I have a chance

1 to find it and it is an open page.

2 MR. SHANNON: If you go to
3 Facebook and search Kentucky Outreach
4 Resource, will it be listed on that page
5 as well?

6 MR. THOMAS: I'm sorry, what is
7 it?

8 MR. SHANNON: If someone went to
9 this Facebook page, are the events listed
10 on the page?

11 MR. THOMAS: Yes.

12 MR. SHANNON: I've never seen
13 them there.

14 MR. THOMAS: I just sent the
15 link to the Facebook page. I can also --
16 we can add anybody to the email list to
17 see. So any MCOs, or anybody that would
18 want to receive -- it's multiple
19 varieties. It's like tons of different
20 information that is sent out. One large
21 email at the first of the week on Mondays,
22 generally, and not a bombardment after
23 that. But it has events and things that
24 are going on in the community and we talk
25 a lot about city ordinances and things

1 that happened recently. But it is a
2 resource that I have.

3 If anybody would like to be
4 added to that chat, I can put my email on
5 here. And if they would like to be added
6 I can get them added. If anyone would
7 like to be added to that resource email I
8 can have them added in almost immediately.

9 MR. SHANNON: Good stuff. I'm
10 glad you are here, Nathan.

11 Any questions for Nathan Thomas?
12 All right. Good stuff.

13 Thank you for the questions
14 about the resources. That is another good
15 question.

16 Let's move on. Updates federal
17 Medicaid discussion. Again, we kind of
18 touched on this. Obviously, we are all
19 trying to figure out what happens. We've
20 been hearing that Medicaid is not going to
21 be cut, but they've got to find
22 \$800 million and if they can do that
23 without cutting, it's kind of a miracle.
24 But just so we have insight, but we have
25 discussion of expansion match rate

1 changing, huge expense to Kentucky 9010
2 for the expansion population, Obamacare,
3 essentially, but (audio interruption) we
4 have 1 percent change is now a 9010 match
5 rate, right, Angela? And that drops a
6 point to 79 -- sorry, 89 and 11. That
7 gets to \$75 million. A reach point. And
8 it is 9010.

9 MS. SPARROW: I'm sorry, Steve.
10 I am not certain.

11 MR. SHANNON: I think that is
12 close enough. So there is a change in
13 that we need to find \$75 million to
14 maintain that.

15 The other thing we are hearing
16 what is block raining. What does that
17 look like? We don't know. We have heard,
18 not personally, but it has been reported
19 that Congressman Barr and Congressman
20 Rogers have said we are not going to cut
21 it which means that they get blocked, it
22 and then it goes back to the states to
23 decide how the dollars could spend is one
24 possibility.

25 Change eligibility and work

1 requirement will be mandated. We moved on
2 that road already. Is a huge percent of
3 the expansion populations currently
4 working, but there will be that piece.

5 And if you are at school, you're
6 caring for a family member, you may not
7 have to have that requirement, but I think
8 that those are all things that are out
9 there that are being talked about and what
10 does it look like?

11 I have told people, obviously
12 there is a Medicaid bill and the General
13 Assembly in House Bill 695 that creates
14 the Medicaid Oversight Advisory Board and
15 that is the process that even Medicaid
16 will go through and present to the board
17 what happens next.

18 It is made out of legislators,
19 and community involved folks as well,
20 modeled after a certain pension. It's
21 kind of the gateway to changes and
22 services takes place and this is only --
23 what are the ramifications of that and
24 what does that look like, because House
25 Bill 9 doesn't actually goes away, but 695

1 kind of tells Medicaid slow down, don't
2 expand without telling us, it has some
3 language about prior authorization for
4 behavior health, and they have added a
5 feasibility study for long-term care for
6 populations and things like that, nursing
7 homes, so there is attention given to
8 Medicaid right now and those changes have
9 created a lot of interest in the
10 ramifications and then add that at the
11 federal level, and we don't know what is
12 going to happen there.

13 Many folks are asking what does
14 Medicaid look like a year from now and
15 what is included, so I think that those
16 are hot topics that people are trying to
17 figure out what happens next and that will
18 be established and that will start to meet
19 and see what happens.

20 And the 695 bill will make those
21 changes, and it is kind of linked to the
22 Medicaid Oversight Advisory Board as well,
23 those other big changes. So it is a lot
24 of moving parts and people trying to
25 figure out what is going to take place.

1 Anyone else on Medicaid?

2 We go right to the legislative
3 updates as they were. Those are the two
4 big pieces that have gotten a lot of
5 attention. Any other legislative updates
6 that we want to share?

7 MR. OWEN: Now Steve, you did a
8 good summary, but it's kind of interesting
9 with the 695, because the Senate has a
10 different version. It looks like they are
11 going to have it queued up to vote on
12 Friday and in the House, and essentially
13 they are going to have to compromise by
14 midnight Friday, because I don't think
15 they want to leave it for the governor to
16 veto, they want to pass it before. So
17 their version is different in the House,
18 so I think Friday is going to be very
19 interesting to see.

20 MR. SHANNON: Yes. And
21 procedurally it is, the Senate bills are
22 different. (Audio interruption) I told
23 some other people when we speak to
24 consumers about this -- my example is that
25 the House can pass the cheese pizza, the

1 Senate can pass a supreme pizza, and the
2 final bill is chocolate cake, because it
3 is round. Anything can happen in that
4 process, and then we go from there.

5 But the point that Stuart made
6 needs to be resolved by Friday, because
7 this is a 30-day session and Fridays date,
8 they then take a 10-day break. They come
9 back on the 27th of March and it has to be
10 done by end of March on the 30th for the
11 short session.

12 And the other thing is 10
13 legislative days to veto a bill and
14 Saturdays count as a legislative day, so
15 they go in for a break, and there is
16 enough time during that period that if
17 they veto to come back and override it,
18 and if there is not a veto, then there can
19 be no action by the governor and it can be
20 vetoed, and they can come back on Thursday
21 the 27th, the 28th, and override the veto.

22 But the other thing that is an
23 option in terms of this legislation is
24 that the house can confirm the Senate
25 changes and we can go ahead with that.

1 Procedurally, that can take place. The
2 other piece is they cannot concur and ask
3 the Senate to go back to the House
4 version.

5 Ideally, conversations are
6 taking place now, but what does that look
7 like? And it will be done by the Senate
8 on Friday because it takes -- each chamber
9 has three meetings by title in House Bill
10 695 and a bill relating to Medicaid. The
11 first reading was yesterday, the second
12 was today, and the third reading Friday
13 with the vote.

14 So Stuart is right. It has to
15 be done by Friday or -- the governor can
16 veto.

17 MR. OWEN: He will veto, but
18 they want to pass it before that so they
19 can come back and override and if they
20 wait till the end up to pass it, he'll
21 veto and it will be dead. There will be
22 no bill. So it may be late Friday night.

23 MR. SHANNON: At one point --
24 this is just a story -- but it used to be
25 that they had a clock on the back of the

1 wall and if it was getting late in the
2 session then they would have to stop -- by
3 midnight in this case -- they would unplug
4 the clock. That's true, they would do
5 that. And if it would go past 11:55, then
6 it went to the digital system (audio
7 interruption) with the timestamp on it and
8 they actually did that and they passed
9 seven bills past midnight and they came in
10 and staff said, "you have to stop, you
11 have to stop," and those seven bills were
12 not enacted. The next year they were
13 actually passed. Six of them were. One
14 of them never actually passed. So Friday
15 night at midnight, the digital world is
16 midnight. It's not -- the latest I have
17 seen a bill pass is 1:30 a.m., but now you
18 can't do that.

19 MR. OWEN: That is a good fun
20 fact in history.

21 MR. SHANNON: There you go.

22 The last of the updates. The
23 last thing is the Kentucky Judicial
24 Commission has an opening. If you're
25 interested, the meeting is next Thursday,

1 March 20th at 1 p.m. If you need
2 information, I don't know how to get on
3 there. I can put my email address in the
4 chat and get you the information the link
5 for that. Obviously it's a virtual
6 meeting if people are interested in that
7 workgroup as well. So I'll send that
8 information and get you the link.

9 We've got future agenda items.

10 MS. BICKERS: Steve, this is
11 Erin. Can I ask a quick question going
12 back to Hepatitis C treatments. Are we
13 requesting data from the MCOs or is that
14 just an ongoing discussion that will carry
15 to the next agenda? I just want to make
16 sure if we are going to make a formal
17 request that I get out that out to them
18 timely.

19 MR. SHANNON: I think it's a
20 formal request. I think we are going to
21 follow up on what happens and maybe just
22 add it as an agenda item. Does that make
23 sense, Erin?

24 MS. BICKERS: It does. I will
25 send the request to the MCOs after this

meeting to make sure that they are
prepared for the next meeting.

MR. SHANNON: Yeah, that would
be great. Thank you much, Erin.

All right. That is it. The
next meeting is May 8th. Same time. All
right. Thank you all. I appreciate it.
