

Did You KNOW?

- Most bottled water **does not** contain optimal levels of fluoride
- Fluoride is the **MOST EFFECTIVE** way to reduce tooth decay by:
 - Building stronger teeth as they develop
 - Keeping tooth enamel strong and resistant to cavities forever
- If bottled water is your child's primary water source, their teeth may not be receiving the benefits and protection of fluoride

Find out if your child should receive a **FREE FLUORIDE SUPPLEMENTATION** by scanning the QR code or by visiting:
