Benefits of Getting a COVID-19 Vaccine

COVID-19 vaccines are safe.
- COVID-19 vaccines were developed using science that has been around for decades.
- COVID-19 vaccines are not experimental. They went through all the required stages of clinical trials. Extensive testing and monitoring have shown that these vaccines are safe and effective.
- COVID-19 vaccines have received and continue to undergo the most intensive safety monitoring in U.S. history.

COVID-19 vaccines are effective.
- COVID-19 vaccines are effective. They reduce your risk of getting and spreading the virus that causes COVID-19.
- COVID-19 vaccines highly protect you from serious illness, hospitalization, or death even if you do get COVID-19.
- Getting vaccinated yourself may also protect people around you, particularly people at increased risk for severe illness from COVID-19.

When am I considered fully vaccinated?
People are considered fully vaccinated 2 weeks after their vaccine series is complete.
- Pfizer - 2 injections 21 days apart.
- Moderna - 2 injections 28 days apart.
- Janssen - 1 injection.

None of the COVID-19 vaccines can make you sick with COVID-19.
- None of the COVID-19 vaccines contain the live virus that causes COVID-19 so a COVID-19 vaccine cannot make you sick with COVID-19. Learn more facts about COVID-19 vaccines.
