COVID19 Outcomes		
	Number	Percent
Number of patients Ever Hospitalized	5,315	7.62%
Number of patients Ever in the ICU	1,529	2.19%
Number of patients who have Recovered	11,970	17.17%

Current Patient Disposition	
	Total
Hospitalized	524
ICU	129

1,399,762	58,617	*25,581	1,483,960
Total PCR Tests	Total Serology Tests	Total Antigen Tests	Total Number of Tests

*Total antigen tests and total positive antigen tests are lower in number than yesterday's report due to an input error from one lab who mistakenly reported antigen versus serology testing yesterday. This has been corrected for today's report.

COVID-19 Testing Positivity Rate: 4.11%*

*Based on a 7-day rolling average. Timing of reporting overall lab results versus positives, repeat testing of individuals, duplicate entries and lack of reporting by some labs, make the data imprecise and more appropriate or useful for trending.

The data collected by the Kentucky Department for Public Health (KDPH) on case patients comes from a number of sources, including electronic laboratory reports, provider case disease and COVID-19 investigation reports, local health department investigation results, hospital infection prevention clinical patient data, and KDPH investigation results. Data is often found incomplete and/or incorrect and during KDPH investigation individual patient-level data is added to, corrected, and de-duplicated so that overall case counts and aggregate data values change daily.
