**Guidance for COVID-19 Quarantine for Vaccinated Persons in the Healthcare Setting**  
*(Based on CDC Guidance, found [Here](https://www.cdc.gov/coronavirus/2019-ncov/hcp/infection-control-after-vaccination.html))*  

**Vaccinated persons who are exposed to a COVID-19 positive person are not required to quarantine if they meet the following criteria:**

- Are fully vaccinated:
  - ≥2 weeks following receipt of the second dose in a 2-dose series,
  - ≥2 weeks following receipt of one dose of a single-dose vaccine
- Have NO symptoms since the current COVID-19 exposure
- Are **not** patients or residents in healthcare settings (e.g., skilled nursing facilities)
  - these individuals should continue to quarantine if exposed
- Please refer to the following website for additional information:  

*Quarantine is no longer recommended for residents who are being admitted to a post-acute care facility if they are fully vaccinated and do not have known exposure*

**Persons who do not meet all of the above criteria should follow current quarantine guidance†** after COVID-19 exposure

1. *(Strongly Recommended)* Quarantine for 14 days; especially if you are going to be around people at high-risk; such as the elderly or those with co-morbidities
2. Other options for quarantine are available, but are generally **not** recommended in the healthcare setting:  

**Vaccinated persons who do not quarantine after exposure should continue to do the following, even, as possible, in the work setting:**

- Monitor for symptoms for 14 days following exposure
- Stay at least 6 feet away from others
- Wear a mask
- Avoid crowds and poorly ventilated spaces
- Cover coughs and sneezes
- Wash hands often
- If you need support or help, call your healthcare provider, local health department, or 1-844-KYTRACE
