

Healthy at Work

Effective April 19, 2021

Supplemental Requirements for Weddings, Funerals, and Memorial Services

These supplemental requirements apply to weddings, funerals, and memorial services. All Entities must also comply with current [Healthy at Work Minimum Requirements](#) and all Supplemental Requirements applicable to their setting and/or activities.

- Wedding, funeral, and memorial service providers must, to the greatest extent practicable, suggest and encourage alternatives to handshaking, handholding and hugging.
- Wedding, funeral, and memorial service providers must, to the greatest extent practicable, limit congregational singing during services, as doing so may aerosolize infectious particles. To the extent practicable, funeral and memorial providers should consider alternatives to congregational singing including playing pre-recorded or live instrumental music (e.g., pianos and guitars - no wind instruments) during services.
- Wedding, funeral, and memorial service providers should, to the extent practicable, provide live streaming options to enable virtual participation by persons at higher risk for severe COVID-19 illness and/or additional persons unable to be accommodated within the venue capacity restrictions required by Healthy at Work Minimum Requirements.
