

## Let's work together to keep your school open. *Safely.*

### About Aegis:

For more than 30 years, Aegis Sciences Corporation has been recognized as a national leader in health care and forensic laboratory sciences. In fact, we've received several NIH grants because of our ability to maintain accuracy even at a capacity of over 130,000 tests per day. Aegis laboratories are accredited by the College of American Pathologists (CAP) and are CLIA-certified through the Centers of Medicare & Medicaid Services (CMS).

### Area Counties/Communities/Schools Services:

- All Kentucky Counties

### Resources Needed:

- Platform has been utilized through multiple collection methodologies, including central location on-site (gym), drive thru lane, individual classroom, etc. Depending on the preferred model, Aegis provides a specific playbook of resources needed.
- Internet Connection / Wifi is required.
- For central or lane collections:
  - 2 Long Tables per Lane
  - 2 Chairs per Lane
  - 1 Electrical Outlet per Lane
  - 1 Extension Cord (if outlet is far from Collection Site)

### Onsite Testing Team:

- Capable of providing on-site resources, training school team members (if desired), or providing off-site collection locations through partnership with Walgreens.
- If on-site, able to scale teams based on demand. All have Approved Background Checks completed.
  - For small scale, single lane sites, the testing and administration can be performed by a single individual.
  - For large scale, multi-lane sites, three person teams are utilized for consent/registration, check in/check out, and test administration.
- Testing team has experience testing in multiple settings, including schools, and with school aged children.

### Account Management:

- Dedicated Account Managers and Logistics Coordinators assigned specifically to your school to manage all aspects of testing and supplies.
- Consent, Registration, and Results are managed through an integrated technology platform that eliminates barriers to through easy to use, multi-modal options.
- Customized dashboards that allow for stratification or grouping of participants and quickly demonstrate success of your program.

### Testing Timelines:

- No minimum number of individuals tested if collected by school personnel. If on-site resources provided, a minimum of 10 individuals is required.
- If on-site resources are required, 2 weeks in advance for scheduling and any number of days can be accommodated
- RT-PCR Results in 24 hours
