

## Long Term Care Facilities Update February 1, 2021

The Cabinet for Health and Family Services are working together to address the complexities of responding to COVID-19 in a manner that is in the best interests of long-term care residents, according to the capabilities of individual healthcare facilities and systems.

Of note:

Data gathering. Positive cases of the novel coronavirus in long-term care facilities are reported every day by local health departments and facilities to the Kentucky Department for Public Health (KDPH). The state DPH makes this information available to the public most every 9 days on kycovid19.

The legal residence of someone living in a long-term care facility is used for KDPH reporting consistency. KDPH references legal residence when reporting health information without exception, including communicable diseases (salmonella, smallpox or other outbreaks), transmissible diseases, like cancer. KDPH then shares this data with the U.S. Department for Health and Human Services, the Centers for Disease and Prevention, and other entities. Using legal residence

If a Kentuckian is away from home on vacation in Florida, for instance, and is rushed to the emergency room and receives a cancer diagnosis, it will identify the patient as a Kentuckian. Using legal residence in this consistent way helps the public, medical experts and others track things like certain types of conditions. It also helps with surveillance of seasonal things, such as the increase in flu cases.

There is potential for error in what is reported to KDPH; potential for error in aggregating or categorizing the data and creating the report that is posted to the kycovid19 site. Additionally, at times a resident of one of these facilities who became COVID-19 positive was not actually exposed or symptomatic while at the facility due to hospitalization elsewhere prior to their COVID-19 cases but is still placed on the list because the positive individual listed their facility as their permanent residence.

The Cabinet for Health and Family Services has established a Long Term Care Task Force to advise long-term care facilities on issues, including testing strategies, infection control measures, Personal Protective Equipment (PPE) strategies, staffing, resident/staff cohorting based on COVID-19 status, financial needs, and resident transfers to acute care hospitals, when indicated. Facilities included in the list have a mechanism for communicating regularly with residents, family members, local health departments and other partners. Facilities that have not been tested positive for COVID-19 has been inside the facility within 14 days prior to the date of their COVID-19 test.

Confirmed positive results meet confirmatory laboratory evidence. Probable results meet clinical criteria AND epidemiologic evidence, OR confirmatory laboratory testing performed for COVID-19. Meets presumptive laboratory evidence AND either clinical or epidemiologic evidence, OR meets vital records criteria with no confirmatory laboratory testing performed for COVID-19.

Today's data only contains cases that are current in 2021. It includes all new cases since 1-22-2020. Facilities with current cases have been removed. Find [2020 LTC Facilities Data here](#)

LTCF COVID-19 DATA 2021
