

Maverick Health
Supporting Population Health for Better Healthcare Outcomes.

About us:

Maverick Health is an end-to-end provider of healthcare testing, testing materials, staffing, and software solutions to school districts. We currently support testing programs for several state health departments nationwide and can provide any modality of COVID-19 testing across the state of Kentucky. Whether it's community public drive thru testing events, employee and student testing, or individual at home testing, Maverick Health can support all modalities using our non-invasive saliva or shallow nasal swab tests. We look forward to partnering with your school district as a true partner and an extension of your team.

- Dashboard and reporting
- PCR testing
- Rapid Antigen testing
- Parental consent software
- Surveillance/Screening Covid-19 testing
- Outbreak testing
- Routine mass testing
- Pop-up drive-through testing

Areas serviced:

Maverick Health can service all 120 counties across the state of Kentucky. The Maverick team has extensive experience with school and test to stay programming. We currently operate the entire state of Mississippi's K-12 testing programs in over 150 schools. We staff the events, support the testing, as well as provide the technology, reporting, and all other relevant components. We also operate testing in K-12 schools across 30+ counties in the neighboring state of West Virginia. We are fully aware of school specific challenges related to consent, testing methods, etc. and are confident and capable of monitoring and navigating those sensitive discussions. We are fully capable of supporting K-12 testing in any modality requested in Kentucky and look forward to providing the assistance needed.

Testing team:

Our on-site testing team is experienced in working with and testing school-aged children and have undergone extensive background screening. Their experience helps ensure a seamless transition from test collection to result reporting.
