

# KENTUCKY K-12 COVID-19 TESTING

Empowering Parents, Guardians, and Faculty

## About the Nephron Protocol

Nephron Pharmaceuticals Corporation and its partners are proud to support the State of Kentucky's K-12 back to school program with **completely customizable solutions** that fit each school district's needs.

- **\*NEW\*** At Home Rapid Screening & Confirmatory PCR Testing
- Rapid Lateral Flow tests
- Molecular PCR and/or LAMP tests
- Drive-Thru Testing
- Event / Extra-Curricular Mass & Pool Testing
- End to End Turn-Key Managed Solutions
- Covid-19 Vaccinations
- Real-time Reporting Dashboard to Track Outbreaks

To date, Nephron and partners have **administered over 1,000,000 tests** and counting using our non-invasive, comprehensive, efficient methods, supported by our **capacity to administer 40,000 tests/day**. Additionally, our testing programs are reinforced with AI technology, reporting capabilities, and tracking data collection so school administrators can identify outbreaks earlier and quarantine students **ONLY** when necessary.

## Turn Key Solution

- Portal for rResults and Reporting to the State – compliant and cyber secure
- High Complexity Laboratory with Reference Labs (40K tests per day)
- Direct Manufacturer for **USA made** At-Home Rapid Tests (Antigen)
- Onsite POC testing with both rapid Antigen and PCR for regular testing schedule or extra curricular events
- Scalable staffing can handle every aspect of admin and reporting

We support **ALL** Kentucky Counties

## OUR CAPABILITIES & HISTORY

+1,000,000 PCR tests  
administered and counting

+40,000 PCR Tests Per Day

+300 POC antigen rapid tests per  
hour per school (high velocity)

Empower parents & guardians to
