CDC’s Strategy to Reinforce Confidence in COVID-19 Vaccines

**Build Trust**
Objective: Share clear, complete, and accurate messages about COVID-19 vaccines and take visible actions to build trust in the vaccine, the vaccinator, and the system in coordination with federal, state, and local agencies and partners.
- Communicate transparently about the process for authorizing, approving, making recommendations for, monitoring the safety of, distributing, and administering COVID-19 vaccines, including data handling.
- Provide regular updates on benefits, safety, side effects and effectiveness; clearly communicate what is not known.
- Proactively address and mitigate the spread and harm of misinformation via social media platforms, partners, and trusted messengers.

**Empower Healthcare Personnel**
Objective: Promote confidence among healthcare personnel* in their decision to get vaccinated and to recommend vaccination to their patients.
- Engage national professional associations, health systems, and healthcare personnel often and early to ensure a clear understanding of the vaccine development and approval process, new vaccine technologies, and the benefits of vaccination.
- Ensure healthcare systems and medical practices are equipped to create a culture that builds confidence in COVID-19 vaccination.
- Strengthen the capacity of healthcare professionals to have empathetic vaccine conversations, address myths and common questions, provide tailored vaccine information to patients, and use motivational interviewing techniques when needed.

**Engage Communities & Individuals**
Objective: Engage communities in a sustainable, equitable and inclusive way—using two-way communication to listen, build trust, and increase collaboration.
- Empower vaccine recipients to share their personal stories and reasons for vaccination within their circles of influence.
- Work with health departments and national partners to engage communities around vaccine confidence and service delivery strategies, including adaptation of vaccination sites to meet community needs.
- Collaborate with trusted messengers—such as faith-based and community leaders—to tailor and share culturally relevant messages and materials with diverse communities.

*Personnel = All staff working in healthcare settings, including physicians, PAs/NPs, nurses, allied health professionals, pharmacists, social workers, support staff, and community health workers
