- Clinics/Pharmacies that use an existing electronic interface (EHR) to enter vaccination data into
- *AND* the system has live connection with the Kentucky Health Information Exchange (KHIE)

Electronic Reporters

- Clinics/Pharmacies without an existing electronic interface (EHR) system
- Or clinics with an EHR that isn't connected through KHIE

Manual Reporters

	Electronic Reporters	Manual Reporters
How do I report vaccines administered at my clinic to KYIR?	Vaccination information is entered into the clinic's Electronic Medical Records (EMR).	All vaccination information is directly entered into the KYIR web application.
What information am I reporting to KYIR?	Vaccination data that's entered into the clinic's EHR is sent to KYIR through KHIE, and the vaccination is recorded on the patients' records.	Vaccination and patient demographic information are entered directly into KYIR. Doses administered are reflected in the clinic's On-Hand Inventory in KYIR
What does my clinic need to enter in KYIR?	**No vaccination or patient data needs to be entered into KYIR.** Should routinely check immunization data reflects accurately in KYIR and matches what is sent from EHR. Clinics that are enrolled in a state vaccination program (VFC, COVID, 317) order vaccine and report inventory with KYIR.	**Report vaccination data to KYIR:** Search for/create the patients in KYIR to add and administer the doses given to the patient record. *Also have the option to use the mass event module.* Clinics that are enrolled in a state vaccination program (VFC, COVID, 317) order vaccine and report inventory with KYIR.
How is my inventory managed in KYIR?	Inventory *does not auto-decrement* as vaccines are administered through your EMR. Must complete a reconciliation to adjust inventory counts. Should run inventory reports to confirm doses administered in KYIR matches doses in EHR. (embed link)	On-Hand inventory counts *auto-decrements* as vaccines are added to patient records in KYIR. Patient detail and services report.
Who at my clinic needs access to the KYIR front facing site?	Primary & Back-up Coordinators *need* to access KYIR for inventory management (if VFC, Adult Immunization or COVID-19 vaccine provider)	Primary & Back-up Coordinators need to access KYIR for inventory management (if VFC, Adult Immunization or COVID-19 vaccine provider) Any staff that will be responsible for data entry in KYIR will need a user account and login
