

COVID-19

DURING PREGNANCY

SYMPTOMS OF COVID-19

- Cough
- Fever/chills
- Difficulty breathing
- No energy
- Body aches
- Headaches
- Sore throat
- Runny nose
- Nausea/Vomiting/Diarrhea
- New loss of taste/smell

SPREAD OF COVID-19

COVID-19 spreads when someone sick coughs, sneezes or gets close to your baby.

IMMUNIZATION AGAINST COVID-19

Infants cannot receive their own protection against COVID-19 until they are 6 months old. Pregnant patients who get the COVID-19 vaccine, pass short-term protection from COVID-19 to their newborn.

FACTS ABOUT COVID-19

If you are pregnant, COVID-19 is more likely to cause serious illness and increases the risk of complications that can affect your pregnancy and baby.
