

RSV

(RESPIRATORY SYNCYTIAL VIRUS)

DURING PREGNANCY

SYMPTOMS OF RSV

- Breathing difficulties
- Decreased appetite
- Coughing/Sneezing
- No energy
- Runny nose
- Fever

SPREAD OF RSV

RSV spreads when someone sick coughs, sneezes or gets close to your baby.

IMMUNIZATION AGAINST RSV

Pregnant patients, between 32 and 36 weeks, who get the RSV vaccine pass protection from RSV to their newborn.
