RE: Opportunity for Public Comment on the Maternal and Child Health Services Title V Block Grant FFY2022.

The Cabinet for Health and Family Services announces the Maternal and Child Health Services Title V Block Grant Executive Summary of the application for federal funds as authorized by the Health Resources and Services Administration (HRSA). The FFY 2021 application is posted for review.

This is available for review and public comment beginning August 16, 2021 through August 27, 2021. These funds support many programs affecting health outcomes for pregnant women, infants, children and children with special health care needs.

The current application is available at <https://chfs.ky.gov/agencies/dph/dmch/Pages/default.aspx> annually by October 30. The application includes the required 5-year needs assessment and updates, a report of activities conducted for the previous year with review and reporting for the identified national performance measures (NPMs) and state action plan.

Upon receipt and approval of this application, Kentucky will receive a funding dependent upon federal budgetary appropriations. Grant funds require a state match of \$3 dollars for every \$4 received in the grant. The application is in a format required by HRSA. The Department for Public Health accepts written comments related to the application or needs assessment through close of business, August 27, 2021. Written comments may be sent to: MCH Title V Block Grant Administrator, CHFS, DPH, 275 E. Main St., HS2WC, Frankfort, KY 40621 or to email address mchdivision@ky.gov.
