

**Department for Public Health
CHILDHOOD LEAD POISONING PREVENTION PROGRAM (CLPPP)
BLOOD LEAD SCREENING RECOMMENDATIONS**

The American Academy of Pediatrics (AAP) and Centers for Disease Control and Prevention (CDC) recommend that health-care providers use a blood lead test to screen blood lead levels of children at ages 1 and 2, and children 25-72 months of age who have not previously been screened. Blood lead screening should be provided for at-risk children less than or equal to 72 months of age and prenatal patients if they meet one of the following risk factor criteria:

- Recipient of the Commonwealth's Medical Assistance Program (Medicaid) (KRS211.903) must be blood lead tested at ages 1 and 2 and at 25-72 months if not previously screened (per CMS Regulation)
- Child resides in a 'Targeted Zip Codes' area
- Answers "Yes" or "Don't know" to any question on the enclosed 'Verbal Lead Risk Assessment'

(KRS 211.900 (7) "At-risk persons" shall mean all children seventy-two (72) months of age and younger and pregnant women who reside in dwellings or dwelling units which were constructed and painted prior to 1978, or reside in geographic areas defined by the cabinet as high risk, or possess one (1) or more risk factors identified in a lead poisoning verbal risk assessment approved by the cabinet).
