Nutrition Basics

Eating Healthy With Diabetes
Choosing healthy foods can help manage diabetes. You may have to learn new ways to prepare and cook foods to have a balanced meal plan that includes carbohydrates, protein, fats, vitamins, minerals and water for good health.

Managing diabetes can help delay or prevent the serious health problems that come from uncontrolled diabetes.

Favorite foods we grew up with may not always be the best choice. Traditional recipes were often heavily seasoned with butter and salt, or were prepared by frying in large amounts of lard, shortening or some other type of fat. We often hear “my grandparents ate fried foods at every meal and lived to 100…” and in many cases this is true but our grandparents worked jobs that involved hard physical labor everyday. We must strive to balance our calorie intake with daily activity.

This booklet has been revised and updated to reflect current evidence-based diabetes and nutrition information. We want to acknowledge the original authors: Mechelle Coble, MS, RD, LD, CDE, Judith Watson, RN, MS, CDE, CN, and Paula White, MS, RD, LD for their work and efforts to create this booklet.
Food provides many nutrients to help keep our bodies working. These include: carbohydrates, protein, fat, vitamins, and minerals. They are often measured in “grams”. A gram is about the weight of a small metal paper clip.

**Carbohydrate** has 4 calories per gram. It is the main source of energy for the body. Starches/grains, starchy vegetables, fruit, milk and sugar/sweets are food groups that have carbohydrate in them.

**Protein** has 4 calories per gram and provides the building blocks for muscle and tissue in the body. Meat, fish, poultry, eggs, cheese, legumes (beans and peas), nuts and seeds provide protein.

**Fat** has 9 calories per gram. Examples of fat are oil, butter, margarine, animal fat (lard, bacon grease) and shortening. Fat provides energy and moves vitamins throughout the body.

Some foods are made up of only carbohydrate, protein or fat. Some are a combination of carbohydrate, protein, and fat. It is important to eat a variety of foods to get the nutrients the body needs.
What is Carbohydrate?

Starches/Grains

Starches are plant foods or foods made from grains. Some examples include breads, crackers, pasta, rice, and starchy vegetables such as potatoes, corn, peas, and dried beans and peas. Experts recommend that 1/2 of your grains be whole grains. Whole grains contain the entire seed of the plant, including the bran, germ, and starchy exterior.

**Serving Sizes:**
- 1 slice bread
- 4-6 crackers
- 1/2 hamburger or hotdog bun
- 1/3 cup pasta or rice
- 1/2 cup starchy vegetable
  (potatoes, corn, peas, dried beans, sweet potatoes, lima beans, and winter squash)

Nonstarchy Vegetables

Many vegetables are low in calories and carbohydrate. They provide vitamins, minerals, and nutrients that help lower risk for diseases. Eat a rainbow of colorful non-starchy vegetables help prevent cancer.

**Serving Sizes:**
- 1 cup raw
- 1/2 cup cooked
- 1/2 cup juice
What is Carbohydrate?

Fruit

Fruit provides vitamins, minerals and nutrients to fight disease and help prevent cancer. Fruit is found in various sizes. Fruit juice is a very concentrated source of carbohydrate.

Serving Sizes:
1 small piece fresh fruit
1/2 banana
1/2 cup canned (in own juice, water or pear juice)
1/2 cup fruit juice (1/3 cup of grape or cranberry)

Fiber

Some starches have dietary fiber. Fiber is not used by the body for energy, but helps to make you feel full and decreases constipation. The amount of fiber in foods can be changed by cooking or processing. For example, an apple has more fiber than apple juice and a baked potato with the skin has more fiber that a mashed potato.

High fiber choices are foods that have 5 grams or more of fiber per serving. Good fiber choices have 2.5 to 4.9 grams of fiber per serving.

Fiber Recommendations

<th>Women</th>
</tr>
</thead>
<tbody>
<tr>
<td>50 years or younger</td>
<td>38 grams</td>
<td>25 grams</td>
</tr>
<tr>
<td>More than 50 years</td>
<td>30 grams</td>
<td>21 grams</td>
</tr>
</tbody>
</table>
What is Carbohydrate?

Milk / Other Dairy

Dairy foods provide lactose which is a source of carbohydrate. They also provide calcium, vitamin D and phosphorus. Adults and children over age two should choose 1% or fat free milk. Children 1–2 years old should drink whole milk. Other unsweetened beverages such as almond, soy and cashew milk are low in carbohydrate. These may be a good choice for persons who do not tolerate lactose.

Serving Sizes:

- 8 oz milk
- 6 oz yogurt (no sugar added and fat free)

Sweets and Desserts

Limit added sweets in your meal plan. They provide a lot of carbohydrates and little nutrition value.

Sweets may have sugar, sugar alcohol, corn syrup (high fructose corn syrup), fructose (concentrated fruit juice), molasses, sorghum, and/or honey.

Sweets are: candy, cakes, pies, cookies, desserts, regular soft drinks, regular Kool-Aid®, fruit flavored drinks, Powerade® and Gatorade®.

If eaten, sweets must be counted as part of the meal plan and substituted for other foods.

Limit sweets to 1-2 times per week for better health and weight control.

Remember that “sugar-free” does not mean low in carbohydrates or calorie free.
Sugar and Sugar Substitutes

With planning, sugar can be a part of a meal plan for people with diabetes. Sugar substitutes can add sweetness with fewer or no calories.

**Sugars:**
Other forms of sugar that may be in products labeled as sugar free: honey, corn syrup, dextrose, maltose, fructose, sorghum, and molasses.

**Sugar Alcohols:**
Have calories, cause blood sugars to rise, and can have a laxative effect. Look for sorbitol, maltitol, isomalt, xylitol, and hydrogenated starch hydrosylates on the ingredient list. These are often found in “sugar free” items.

**Sugar Substitutes:**
- Acesulfame K - Sweet One® Sunnette®
- Advantame
- Aspartame - Nutra Sweet® or Equal®
- Monk fruit extract or Luo han gou extract – Nectresse®, Monk Fruit in the Raw®, PureLo®
- Neotame - Newtame®
- Saccharin - Sugar Twin® or Sweet-n-Low®
- Stevia - Truvia®, Purvia®, Enliten®
- Sucralose - Splenda®

**Sugar Substitute Blends:**
These baking blends are 1/2 sugar substitute and 1/2 sugar. They are not calorie or carbohydrate free foods. Two examples are Splenda® Sugar Blend for Baking and Truvia® Brown Sugar Blend.
Proteins are the building blocks of the body and are needed for good health. Protein needs are based on each person. Most Americans eat too much protein.

Daily needs for healthy people are about 2-3 ounces at two of their three meals per day. A deck of cards or the palm of a women’s hand is equal to 3 ounces of cooked protein.

Most people get their protein from beef, pork, chicken, turkey, fish, wild game, or eggs.

Other sources of protein include dried beans and peas, cheese, nuts, soy, and milk or milk products.

If you have kidney problems, you may be told to limit protein.

**Serving Sizes:**

3 ounces of protein = 3 ounces cooked chicken, beef, pork, fish, or game and is the size of the palm of a woman’s hand

1 ounce of protein = 1/4 cup cottage cheese or 1 egg or 1/4 cup tuna, 1/2 cup of cooked beans/legumes, one ounce of cheese

1 ounce of protein = 2 tablespoons of peanut, almond or cashew butter or tahini

1 ounce of protein = 23 whole almonds, 7 whole walnuts, 85 pumpkin seeds or 49 pistachios
What is Fat?

Fats help the body to use some vitamins, add flavor to food, and are needed in small amounts for good health. It is best to choose monounsaturated (example: olive oil) and polyunsaturated (example: margarine in tub) fats which are usually liquid at room temperature. Saturated fats (example: butter or shortening) are hard at room temperature and are linked with blood vessel and heart disease.

Serving Size:
1 teaspoon butter, oil, margarine, or mayonnaise
1 tablespoon reduced fat margarine or mayonnaise
1 tablespoon salad dressing
2 tablespoons reduced fat salad dressing or sour cream

Simple ways to lower fat:

Cut the amount in half and see if it tastes good. Measure fat before adding.

Do not add fat to foods because you always have or your parents did. Try cooking without all the added fat.

Bake, grill, microwave, roast, boil, or broil your foods instead of frying.

Do not fry foods with added fat. Use cooking sprays to brown foods.

Choose oils that are liquid at room temperature, such as olive or canola oils.

Look for total fat content on the food label. Keep it less than 3 grams for every 100 calories.
The “Nutrition Facts” label is the best source of nutrition information. It shows the:

- Serving size and servings per container.
- Total calories per serving.
- Total fat grams per serving is listed with amounts for both Saturated and Trans fat.
- Cholesterol per serving.
- Sodium (salt) per serving.
- Total carbohydrates per serving including sugars and dietary fiber per serving. “Added sugars” is required on labels. Limit to less than 10% of total daily calories.
- Total grams of protein per serving.
- Vitamins and Minerals required to be listed include: Vitamin D, Calcium, Iron and Potassium.
- Daily Value percentages on the right side of the label represents values for a 2000 calorie diet.

Additional Tips:

- Servings sizes on the nutrition facts label may not be the exact serving size for your meal plan.
- If you are eating more than one serving, multiply the amount of calories and nutrients listed by the number of servings you eat to get the total.
- A rule of thumb for sodium (salt) is 400mg or less per single serving and 800mg or less for a meal.
- Ingredients are listed in order of the amount they are found in the food.
People with diabetes are at increased risk of having high blood pressure. Limiting salt is one way to help control blood pressure.

**Simple Ways to Decrease Salt:**

- Limit canned and processed foods that are high in sodium. Choose more fresh and frozen foods. Rinse canned vegetables.
- Limit salty snacks and treats, such as pretzels, chips, salted nuts, and snack meats.
- Limit convenience foods, such as prepackaged lunch meats, frozen dinners, and fast foods.
- Do not add salt while cooking.
- Do not add salt after cooking.

Try seasoning foods with herb and spice blends instead of salt. Make sure the blend is the spice or herb and not a salt blended with spice or herbs (for example, choose garlic powder instead of garlic salt).
Tips for Meal Planning

**Meal Sizes**—Make meals about the same amount with equal portions of carbohydrate at each meal.

**Timing**—Eat meals about the same time every day (4-5 hours apart). If you take medicines with food, eating on time can help your routine.

**Fixing Meals**—How you fix food plays an important role in reducing the salt, fat, and sugar in your meals.

**Snacks**—Snacking depends on your blood sugar control, some people with diabetes need a planned bedtime snack.

**Holidays**—Plan ahead for holidays and other special events so you can follow your meal plan and eat at about the same time.

**Eating Out**—Eat meals away from home at about the same time, follow your meal plan, and remember your portions sizes. Ask how the food is prepared - try grilled, instead of fried; or a salad instead of French Fries. Do not super size a meal.

**Alcohol**—May cause low blood sugar. Drink alcohol only with a meal and in moderation. Limit to no more than 1 drink for women and 1-2 drinks for men per day.
**Meal Planning**

A “healthy” daily meal plan for older children and adults who are not overweight is about 2,000 calories and includes the following foods each day.

- 2 cups of fruit each day (about 2-3 servings).
- 2 1/2 cups of vegetables each day (about 5 servings).
- 6 ounces of grains (make at least 1/2 your grains whole grain), beans and starchy vegetables.
- 3 cups of low-fat or fat-free milk or other dairy products.
- About 5 1/2 ounces of lean meat or meat substitute.
- Know your limits on added fats, sugars, and salts.
- Be sure to include physical activity in your daily routine.

It is important to find a meal plan that best suites you. Carbohydrate counting and the plate method are two plans that work well for many people.
Carbohydrate Counting

Research shows that carbohydrates raise blood sugar and that counting the amount of carbohydrates in meals can help manage blood sugars and prevent or delay the complications of diabetes.

The more carbohydrates you eat, the higher your blood sugar will rise. One of the keys to blood sugar control is balancing total carbohydrates eaten.

Foods that contain carbohydrates are: milk and yogurt; fruit and fruit juices; beans, cereals, starchy vegetables, and pasta; desserts and snacks.

There are 15 grams of carbohydrate in one serving of carbohydrate. You may hear or see the words carb, CHO or carbohydrate choice.

<table>
<thead>
<tr>
<th>Serving of Food</th>
<th>Amount of Carbohydrate</th>
</tr>
</thead>
<tbody>
<tr>
<td>One starch/grain</td>
<td>15 grams carbohydrate</td>
</tr>
<tr>
<td>One fruit</td>
<td>15 grams carbohydrate</td>
</tr>
<tr>
<td>One milk</td>
<td>12 grams carbohydrate</td>
</tr>
<tr>
<td>One sweet or dessert or other carbohydrate</td>
<td>15-60 grams carbohydrate</td>
</tr>
<tr>
<td>One nonstarchy vegetable</td>
<td>5 grams carbohydrate</td>
</tr>
<tr>
<td>One meat</td>
<td>0 grams carbohydrate, unless breaded or sweetened</td>
</tr>
<tr>
<td>One fat</td>
<td>0 grams carbohydrate, unless breaded or sweetened</td>
</tr>
</tbody>
</table>
## Carbohydrate Counting

<table>
<thead>
<tr>
<th></th>
<th>Women</th>
<th>Men</th>
</tr>
</thead>
<tbody>
<tr>
<td>For Weight Loss (per meal)</td>
<td>30-45 grams carbohydrate (2-3 carb choices)</td>
<td>45-60 grams carbohydrate (3–4 carb choices)</td>
</tr>
<tr>
<td>For Weight Maintenance (per meal)</td>
<td>45-60 grams carbohydrate (3-4 carb choices)</td>
<td>60-75 grams carbohydrate (4-5 carb choices)</td>
</tr>
<tr>
<td>For Snacks (per meal)</td>
<td>15 grams carbohydrate (1 carb choice)</td>
<td>15 grams carbohydrate (1 carb choice)</td>
</tr>
</tbody>
</table>

Spread carbohydrates evenly throughout the day and eat at the same time every day to help manage blood sugars. Use food labels to help count total carbohydrates.

### Examples of Carbohydrate Counting

<table>
<thead>
<tr>
<th>Food Item</th>
<th>Carbohydrate Count</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 poached egg</td>
<td>= 0 gram carb</td>
</tr>
<tr>
<td>2 slices toast</td>

</tr>
<tr>
<td>1/2 cup orange juice</td>
<td>= 15 grams carb</td>
</tr>
<tr>
<td>black coffee</td>
<td>= 0 gram carb</td>
</tr>
<tr>
<td><strong>Total Carb</strong></td>
<td><strong>= 45 grams</strong></td>
</tr>
<tr>
<td>2 oz turkey</td>
<td>= 0 gram carb</td>
</tr>
<tr>
<td>2 slices bread</td>
<td>= 30 grams carb</td>
</tr>
<tr>
<td>1 cup salad</td>
<td>= 5 grams carb</td>
</tr>
<tr>
<td>fat-free salad dressing</td>
<td>= 5 grams carb</td>
</tr>
<tr>
<td>1 oz fat-free chips</td>
<td>= 23 grams carb</td>
</tr>
<tr>
<td><strong>Total Carb</strong></td>
<td><strong>= 63 grams</strong></td>
</tr>
</tbody>
</table>
What is a Healthy Plate?

A healthy diabetes meal plate includes a variety of foods including:

- Vegetables from five subgroups; dark green, red/orange vegetables, legumes (beans and peas), starchy (potatoes and squash) and others.
- Fruits, especially whole fruits.
- Grains, at least 1/2 of which are whole grains.
- Fat-free or low-fat dairy including milk, yogurt, cheese and/or fortified soy beverages.
- A variety of protein foods, including seafood, lean meats and poultry, eggs, legumes (beans and peas), nuts and seeds and soy products.
- Balance calories with physical activity. Try to get at least 30 minutes of activity most days of the week.
- Limit added fats, sugar and salt.
- Place foods on a 9 inch plate no more than 1 inch high using the picture below.
Steps to Make a Healthy Plate

① Fill 1/2 your plate with **Nonstarchy Vegetables**

Some good choices include:
- Asparagus
- Broccoli
- Brussel sprouts
- Cabbage
- Cauliflower
- Carrots
- Celery
- Eggplant
- Green beans
- Greens (kale, mustard, turnip)
- Lettuce
- Mushrooms
- Onions
- Peppers
- Radishes
- Spinach
- Tomatoes
- Turnips
- Zucchini

② Fill 1/4 your plate with **Protein**

Good choices include:
- Beef (chuck, round and sirloin)
- Chicken
- Pork (center loin and tenderloin)
- Cheese
- Eggs
- Low-fat cottage cheese
- Catfish
- Cod
- Haddock
- Lamb
- Oysters
- Shrimp
- Tofu
- Tuna
- Turkey

- Choose beverages to go along with your meal.
- Good choices include:
  - water, calorie-free drinks,
  - unsweetened tea or coffee.
Steps to Make a Healthy Plate

③ Fill 1/4 of your plate with **Starch/Grain**

Examples include:
- Beans (also a source of protein)
- Bread
- Butternut Squash
- Cereal
- Corn
- Crackers
- Green peas
- Lentils (also a source of protein)
- Oatmeal
- Pasta
- Popcorn
- Potatoes (white and sweet)
- Pretzels
- Quinoa
- Rice
- Tortillas

④ Add a serving of **Fruit**

A serving of fruit equals:
- 1 small piece of whole fruit
- 1/2 cup frozen or canned (no sugar added)
- 3/4 to 1 cup of berries or melon
- 2 Tablespoons dried fruit

Choices include:
- Apple
- Banana
- Blueberries
- Fruit Cocktail
- Honeydew melon
- Kiwi
- Orange
- Pineapple
- Peaches
- Pears
- Orange
- Raisins
- Strawberries
- Watermelon

⑤ Add a serving of **Dairy**

A serving of dairy equals:
- 8 ounces of milk
- 6 ounces of yogurt

Choose from:
- Low-fat or Fat-free milk
- Plain non-fat yogurt
- Unsweetened fortified soy, almond or rice beverages
Aim for Healthy Weight

Control Portions
- Learn to estimate portions when you don’t have measuring cups available.
- Eat smaller portions.
- Avoid second helpings.
- Eat off a smaller plate.
- Measure snacks and place them in small bags or containers.
- Avoid eating out of large chip or snack bags.

Weight Management Tips
- Set a reasonable weight goal.
- Healthy weight loss equals 1-2 pounds a week.
- A weight loss may improve blood sugar.
- Make small healthy changes.
- Be active at least 30 minutes most days of the week.
- Control portions.
- Drink 6–8 glasses of water each day.
- Reduce calories.
- Limit the amount of fat added to foods.
## Basic Recipe Substitutions

<table>
<thead>
<tr>
<th>Instead of this:</th>
<th>Replace with this:</th>
</tr>
</thead>
<tbody>
<tr>
<td>1 egg</td>
<td>2 egg whites or 1/4 cup egg substitute</td>
</tr>
<tr>
<td>Nuts</td>
<td>Toast them and use 1/2 the amount</td>
</tr>
<tr>
<td>Chocolate Chips</td>
<td>Mini chips and use 1/2 the amount</td>
</tr>
<tr>
<td>Whole or 2% milk</td>
<td>Skim or 1% milk</td>
</tr>
<tr>
<td>Oil</td>
<td>Cooking spray</td>
</tr>
<tr>
<td>Bacon for seasoning</td>
<td>Lean ham</td>
</tr>
<tr>
<td>Margarine/mayonnaise</td>
<td>Light or fat-free</td>
</tr>
<tr>
<td>Frying</td>
<td>Grill, roast, bake, broil, boil, grill, or microwave</td>
</tr>
<tr>
<td>Sugar</td>
<td>Sugar substitutes/baking blends</td>
</tr>
<tr>
<td>Salt</td>
<td>Vinegar, lemon juice, herbs, or spices</td>
</tr>
</tbody>
</table>
These recipes have been developed over the years and are based on the recipes our mothers and grandmothers prepared. They have been kitchen tested for flavor. The recipes show cooking methods that lower added fat, sugar, and salt. These recipes were analyzed for total calories, carbohydrates and carbohydrate choices, dietary fiber, total fat (monounsaturated, polyunsaturated, saturated fats, and cholesterol), protein, and salt.
Low Fat Chicken and Dumplings

Recipe from Mechelle Coble

3 chicken breasts (boneless and skinless)
2 - 14.5 ounce cans 98% fat free chicken, reduced sodium chicken broth
3 cups self-rising flour
1 teaspoon pepper
Water

Directions
1. Place chicken breasts and 2 quarts of water in a large pot and bring up to a boil. Simmer until chicken is tender (about 30 minutes), remove the chicken and set aside, save the cooking liquid.
2. Add 2 cans chicken broth to the cooking water left in the pot and bring up to a boil.
3. Stir in 1 1/2 cups of enriched cooking broth from the pot into 3 cups of flour. Stir in enough cold water until the mixture looks like biscuit dough.
4. Drop the dough mixture into the boiling broth by the teaspoon. Gently stir the dumplings and broth.
5. Shred the cooked chicken and return to the cooking pot. Sprinkle 1 teaspoon black pepper and adjust the seasonings as needed.
6. Simmer for an additional 3-5 minutes and serve.

1 1/2 pounds skinless, boneless chicken breasts
1 cup crushed corn flakes
1/2 cup skim milk
1/4 teaspoon salt
1 teaspoon pepper
1 teaspoon garlic powder
1 teaspoon onion powder

Directions
1. Combine all dry ingredients into a zip bag.
2. Place skim milk into a shallow bowl and dip chicken breasts into the wet mixture.
3. Place chicken breasts one at a time into the dry mixture and shake to coat well.
4. Remove chicken from the zip bag and lay in a baking dish.
5. Bake at 375 degrees for 35 minutes.

Bean Soup

Recipe from Paula White

Serves: 10   Serving Size: 2 cups

1 pound dry beans  (pinto, navy, or great northern)
4 quarts water
1/2 pound lean ham, chopped fine
1/4 teaspoon salt
1 teaspoon black pepper

Directions
1. Begin by removing any foreign objects from the dry beans. Rinse the beans and place them into a 5 quart stock pot. Cover the beans with water and allow them to soak overnight.
2. Pour off the soaking water and cover beans with fresh water, about 4 quarts.
3. Do not salt the beans until they are nearly done. Salting beans at the beginning of the cook time will result in tough beans.
4. Allow the beans to come up to a boil, reduce the heat to simmer. Cover the pot with a lid and simmer until they are tender, about 4 hours.
5. About 30-45 minutes before the end of the cook time, season the beans with the chopped ham, salt, and pepper.
6. Continue to simmer the beans without the lid until cooked to desired tenderness. Adjust seasoning if necessary.

**Vegetable Beef Soup**

Serves: 8   Serving Size: 2 cups

Recipe from Paula White

1 pound beef tenderloin roast
1 1/2 pounds potato
1 small head cabbage
1 medium onion
1 quart diced tomatoes
2 pounds mixed vegetables, frozen
32 ounces beef broth
1/4 teaspoon salt
1/2 teaspoon black pepper
2 bay leaves

**Directions**

1. Combine the beef tenderloin with about 16 ounces of water and simmer in a covered pan until meat is very tender. Adjust the time if you use a pressure cooker to cook the meat. When the beef is done, remove from the pan and allow it to cool. Shred the beef. Save the cooking liquid, place it in the refrigerator to allow the fat to come to the top. Discard the fat.

2. Clean the potatoes, onion, and cabbage. Cut the potatoes and onion into a large dice and shred the cabbage. Combine all into a large stock pot along with 16 ounces of the beef broth and 1/4 teaspoon salt. When the vegetables are crisp tender, add the frozen mixed vegetables, the shredded beef, the de-fatted beef cooking liquid, the tomatoes, black pepper, the remaining beef broth and bay leaves to the stock pot.

3. Bring all of the ingredients up to a gentle boil and boil for two minutes. Reduce the heat, allowing the soup to simmer until all vegetables are tender, add more liquid if needed. You can use water, beef broth, or tomato juice. Adjust seasonings if needed.

Almost Fried Potatoes

Recipe from Paula White

Serves: 4       Serving Size: 1/2 cup

2 whole potatoes (about 1-1/4 pounds), cleaned and sliced
1 whole onion, cleaned and sliced
1 tablespoon canola oil
1/2 teaspoon salt
1/2 teaspoon black pepper

Directions
1. Heat electric skillet to 300 degrees and pour in canola oil. If you do not have an electric skillet use a heavy skillet with a tight fitting lid over medium low heat.
2. Place the potatoes and onions into the hot skillet and season with salt and pepper. Place lid onto skillet, allow the potatoes and onions to steam until tender.
3. When the potatoes are tender, turn the heat up to medium high to crisp and brown the potatoes and onions.
4. Increase heat to 350 degrees, When the vegetable are nearly done, remove the lid and allow the potatoes to brown and crisp. You have to watch the vegetables closely, do not let the vegetables scorch.
5. Remove potatoes to a warmed serving bowl and enjoy.

Cornbread

Recipe from Paula White

Serves: 6       Serving Size: 1 muffin

1 cup self-rising cornmeal mix (I prefer White Lily™ or Martha White™)
1 large egg
1 cup low-fat buttermilk

Directions
1. Place your well-seasoned cast iron cookware in the oven to preheat with the oven at 425 degrees. I like to use muffin or corn stick cast iron.
2. Combine all ingredients in order given. The batter should be thin.
3. Lightly spray the cookware with cooking spray and filling the irons 2/3 with the batter.
4. Bake at 425 degrees for about 20 minutes or until golden brown.
5. Remove the cornbread from the irons and serve.

Cornbread
Recipe from Paula White
Serves: 6
Serving Size: 1 muffin
Reduced Fat Biscuits

Serves: 10   Serving Size: 1 biscuit
Recipe from White Lily Recipes

1 3/4 cups sifted all-purpose flour
2 1/2 teaspoons baking powder
1/2 teaspoon salt
1 tablespoon canola oil
2/3 cup skim milk

Directions
1. Preheat oven to 500 degrees.
2. Sift flour, baking powder, and salt together into a mixing bowl. Set aside.
3. In a small bowl, whisk together milk and canola oil, add the wet ingredients all at once to the flour mixture. Stir quickly with a fork until dough clings together.
4. Knead dough lightly about 10 times.
5. Place dough on a 12 x 16 inch sheet of waxed paper. Pat dough out until it is about 1/2 inch thick. Cut with an unfloured, biscuit cutter.
6. Place biscuits on an ungreased baking sheet and bake until golden, about 12 to 15 minutes.

Reduced Fat Biscuits
Recipe from White Lily Recipes
Serves: 10   Serving Size: 1 biscuit

1 3/4 cups sifted all-purpose flour
2 1/2 teaspoons baking powder
1/2 teaspoon salt
1 tablespoon canola oil
2/3 cup skim milk

Directions
1. Preheat oven to 500 degrees.
2. Sift flour, baking powder, and salt together into a mixing bowl. Set aside.
3. In a small bowl, whisk together milk and canola oil, add the wet ingredients all at once to the flour mixture. Stir quickly with a fork until dough clings together.
4. Knead dough lightly about 10 times.
5. Place dough on a 12 x 16 inch sheet of waxed paper. Pat dough out until it is about 1/2 inch thick. Cut with an unfloured, biscuit cutter.
6. Place biscuits on an ungreased baking sheet and bake until golden, about 12 to 15 minutes.

Lower Fat Sausage Gravy

Recipe from Mechelle Coble

Serves: 4  Serving Size: 1/2 cup

2 pork sausage links
3 tablespoons self-rising flour
1/4 teaspoon salt
1 teaspoon black pepper
2 cups skim milk
1/2 cup water

Directions
1. Brown sausage over medium heat. Breaking it into small pieces as it browns. When sausage is done, remove from skillet.
2. Add 1/2 cup water to pan drippings and increase heat.
3. When the pan drippings and water begin to boil; add flour, salt, and pepper. Stir well with a fork or whisk to prevent lumps. Return the sausage to the skillet.
4. Continue to stir until well blended and add milk. Simmer over heat until the mixture thickens.
5. Serve over biscuits.

Seasoned Green Beans

Recipe from Paula White

Serves: 8      Serving Size: 1/2 cup

1 quart green beans
1 whole onion, peeled and halved
2 cloves garlic, peeled
1 teaspoon olive oil

Directions
1. Place all ingredients into a two quart pot. If you are using frozen green beans add about 1 cup water.
2. Allow the beans to come up to a boil and then turn heat to simmer.
3. Simmer the beans, onion and garlic until all are tender and the onion and garlic have infused their flavors into the beans.
4. Pour into a warmed serving bowl and enjoy.

**Tomato, Cucumber, and Onion Salad**

Serves: 8  
Serving Size: 1/2 cup  
Recipe from Mechelle Coble

**Salad Ingredients**
3 whole ripe tomatoes (about 2 1/2 to 3 pounds)  
2-3 medium cucumbers  
1 large onion

**Directions**
1. Clean and slice the vegetables, layer them onto a serving platter.  
2. Combine all ingredients for the dressing and pour over the vegetables.  
3. Allow the salad to marinate for at least 2 hours before serving.

**Dressing Ingredients**
2 tablespoons olive oil  
2 tablespoons vinegar  
1/2 cup water  
3 packets artificial sweetener  
1/4 teaspoon salt  
1/2 teaspoon black pepper
