YOUR BABY: 2 TO 9 MONTHS

POINTS TO REMEMBER

◆ **SAFETY**
  - **ALWAYS WASH** your hands before preparing food, after changing diapers or using the bathroom to keep your baby from getting infections.
  - **ALWAYS PLACE** your baby on his/her **BACK TO SLEEP**, unless instructed not to do so by your health-care provider.
  - **ELIMINATE** tobacco smoke in your baby’s environment (daycare center, babysitter’s house, relative’s house, etc). **MAKE** your car and home a smoke free environment.
  - **ALWAYS BUCKLE** your baby in a car seat and place the car seat in the back seat of the car (facing the rear of the car). When your baby weighs 20 pounds, is 1 year old, and can sit up alone, you can turn the car seat to face the front of the car.
  - **DO NOT** overheat your baby by dressing him/her with **TOO MANY** clothes or **APPLYING** too many blankets.
  - **NEVER LEAVE** your baby **ALONE** in a vehicle. **NEVER LEAVE** your baby alone with a pet or other young children.
  - **TAKE** your baby to a health-care provider’s office for **REGULAR** well check-ups and immunizations.
  - **EARLY SIGNS** that your baby may be **ILL** are fever, vomiting, diarrhea, or failure to eat. **IF ANY** of these signs are present, take your child to your health care provider for evaluation and treatment.
  - **INSTALL** smoke detectors in your home. **CHANGE** the batteries twice a year in the spring and fall when time changes are made.
  - **NEVER LET YOUR BABY** ride in vehicles if you suspect the driver has been using alcohol or drugs. Never **ALLOW** anyone who is drinking or using drugs to provide childcare.
  - **DO NOT LEAVE** your baby alone on high places (chairs, tables, sofas, and chairs). Put gates at the top and bottom of stairs. Don’t leave your baby alone in a tub of water. Don’t use a walker.
  - **HAZARD PROOF** your home. Use safety locks on cabinets. Keep medicines and poisonous products in a safe, secure, locked place, out of your baby’s reach. If your child accidentally takes medication or puts a poisonous product in his/her mouth, call the **POISON HOTLINE 1-800-722-5725**. Place plastic safety plugs in electrical plugs (sockets). Get down on the floor at your baby’s eye level to look for hazards (coins, buttons, safety or straight pins, cords of any type, furniture with sharp or rough edges).
  - **DON’T** drink hot liquids or smoke cigarettes while holding your baby.
  - **INSPECT** toys for small parts or sharp edges and keep these toys out of the reach of your baby.
  - **IF YOU** or your baby are experiencing **EMOTIONAL**, **PHYSICAL**, or **SEXUAL ABUSE**, **TELL** your health-care provider or call the **ABUSE HOTLINE 1-800-752-6200** for help.

◆ **NUTRITION**
  - **BREAST-FEED** your baby if possible at least 6-12 months.
  - **IF** you bottle-feed, feed your baby iron-fortified formula.
  - **DO NOT** give your baby honey.
  - **BEGIN** to introduce iron-fortified **RICE** cereal at 4 to 6 months and **FEED** your baby with a spoon. **DO NOT** put cereal in a bottle. If your baby has no problem with cereal, **ADD** a new pureed fruit or vegetable each week.
  - **EXPECT** your baby to gain 2 pounds each month for the first two months, then 1 pound each month until 1 year of age.
  - **ASK** your health care provider about the WIC program.
After 6 months, introduce solid food gradually with a spoon, and OFFER solid food two to three times a day. OFFER liquids from a cup, start giving juice beginning with apple juice and LIMIT to 4 to 6 ounces per day. NEVER give your baby peanuts, popcorn, hot dogs, large pieces of raw vegetables or fruits, whole grapes, raisins, corn, whole beans or tough meat. Any of these foods can cause your baby to choke.

AT 9 MONTHS, ENCOURAGE finger foods and mashed foods. ALWAYS supervise your baby while he/she is eating. CONTINUE to teach your baby to drink from a cup.

HEALTHY TEETH

TO KEEP TEETH HEALTHY, DO NOT put your baby to bed with a bottle. DO NOT prop a bottle in your baby’s mouth or allow the baby to feed “at will.”

BEGIN to clean your baby’s teeth as soon as they appear, with a thin washcloth wrapped around your finger or a small soft toothbrush.

IF you do not use city water that has fluoride added, GET your water tested to see if your baby needs fluoride supplements. Please note: most bottled waters DO NOT have fluoride added.

CARE and INTERACTIONS

NUTURE your baby by holding, cuddling, talking, singing, and rocking him/her.

ENCOURAGE your baby to talk by PLAYING and TALKING to him/her while dressing, bathing, feeding, playing, walking and driving.

READ to your baby and PLAY music.

YOUR baby may sleep 3 to 4 hours at a time and stay awake 1 hour or longer.

ESTABLISH a bedtime routine by the age of 2 months.

WHEN your baby is 4 months old, put him/her to bed without feeding with the breast or bottle and ENCOURAGE him/her to learn to comfort himself. Provide objects like a stuffed animal, a blanket or a favorite toy. ONLY GIVE your baby toys for his age to STIMULATE his/her interest.

WHEN your baby is upset and crying, he/she can usually be CALMED DOWN by being spoken to or held. There may be times when you may not be able to stop your baby from crying, no matter what you do. Just have patience, after some time, he/she will calm down.

TAKE TIME for yourself and spend some individual time with your partner, friends and family members. AVOID socially isolating yourself.

GROWTH and DEVELOPMENT

The following milestones are typical for babies as they develop.

---

**By 2 Months**
- Smiles and shows pleasure in contact with adults
- Eyes follow you and shows interest in objects
- Coos & Babble's in response to voices
- Lifts head and upper chest with support on forearms when on stomach

**By 4 Months**
- Looks at, opens and holds own hands
- Reaches for objects
- Follows you with his eyes
- Holds head erect, but raises body on hands while on stomach
- Laughs and squeals out loud

**By 6 Months**
- Reaches and transfers object from hand to hand, and puts objects in mouth
- Turns to sound, vocalizes “Dada”, “Baba”
- Babble's to echo you
- Rolls over, sits with support and stands when placed in standing position
- May have stranger anxiety

**By 9 Months**
- Plays Peek-a-boo
- Bangs & throws objects
- Says “Mama” & “Dada”
- Sits up without support
- Responds to name
- Understands “No-no” and “Bye-bye”
- Crawls, creeps or scoots on bottom
- Feeds self
