Water Samples Tested for Fluoride Concentration
Results of Initial Water Sample Test

Fluoride Concentration

Less than 2.00 ppm
Follow Fluoride Supplement Protocols in the PHPR

Equal to or greater than 2.00 ppm
Submit another sample of the water source to the State Lab for testing

Equal to or greater than 2.00 ppm
to 4.00 ppm
Recommend children 8 years of age and younger consume another source of water

Equal to or greater than 4.00 ppm
Recommend children and adults consume another source of water
RN responsible for Fluoride Supplement Program at LHD should contact LHD environmentalists and request an investigation of the water source

Less than 2.00 ppm
Submit another sample of the water source to the State Lab for testing

2 water samples less than 2.00 ppm
Follow Fluoride Supplement Protocols in the PHPR

2 water samples equal to or greater than 2.00 ppm
Follow chart for readings equal to or greater than 2.00 ppm
