- Motor Vehicle Crash Death
- Obesity (Adult)
- Overweight (Adult)
- Pedestrian Motor Vehicle Death
- Poor Dental Health
- Poor General Health
- Population with Any Disability
- Premature Death
- Prostate Cancer Incidence
- Stroke Mortality
- Suicide

Measuring morbidity and mortality rates allows assessing linkages between social determinants of health and outcomes. By comparing, for example, the prevalence of certain chronic diseases to indicators in other categories (e.g., poor diet and exercise) with outcomes (e.g., high rates of obesity and diabetes), various causal relationships may emerge, allowing a better understanding of how certain community health needs may be addressed.

Accident Mortality

This indicator reports the rate of death due to unintentional injury (accident) per 100,000 population. Figures are reported as crude rates, and as rates age-adjusted to year 2000 standard. Rates are resummairized for report areas from county level data, only where data is available. This indicator is relevant because accidents are a leading cause of death in the U.S.

[Download Data](#)

Report Area	Total Population	Average Annual Deaths, 2006-2010	Crude Death Rate (Per 100,000 Pop.)	Age-Adjusted Death Rate, Accident Mortality (Per 100,000 Pop.)

In 2010, Kentucky had the third highest rate of fatal drug overdose in the US.

Welcome

Welcome to the Kentucky Safety and Prevention Alignment Network web site!

KSPAN is a coalition of public and private organizations, and individuals, dedicated to promoting safety and preventing injuries throughout the Commonwealth of Kentucky.

This web site is currently under construction. We will be adding additional content regularly. Please check the site regularly to see our latest additions.

Please take a moment to mark your calendar for our **next KSPAN meeting to be held on Tuesday, December 3, 2013** from 10:00am to 3:00pm at KY Association of Counties (KACo) Training Room, 400 Englewood Drive, Frankfort KY

A KSPAN Executive Committee meeting will also be held on September 6 from 9:00am to 10:00am. Both Executive Committee and general membership meetings are open and all are welcomed to attend!

In the meantime, to learn more about KSPAN, contact Steve Sparrow at the Kentucky Injury Prevention and Research Center at (606) 357-8384 or email at steve.sparrow@uk.edu

Cancer Mortality Rates in Kentucky

Welcome to the Kentucky Cancer Registry

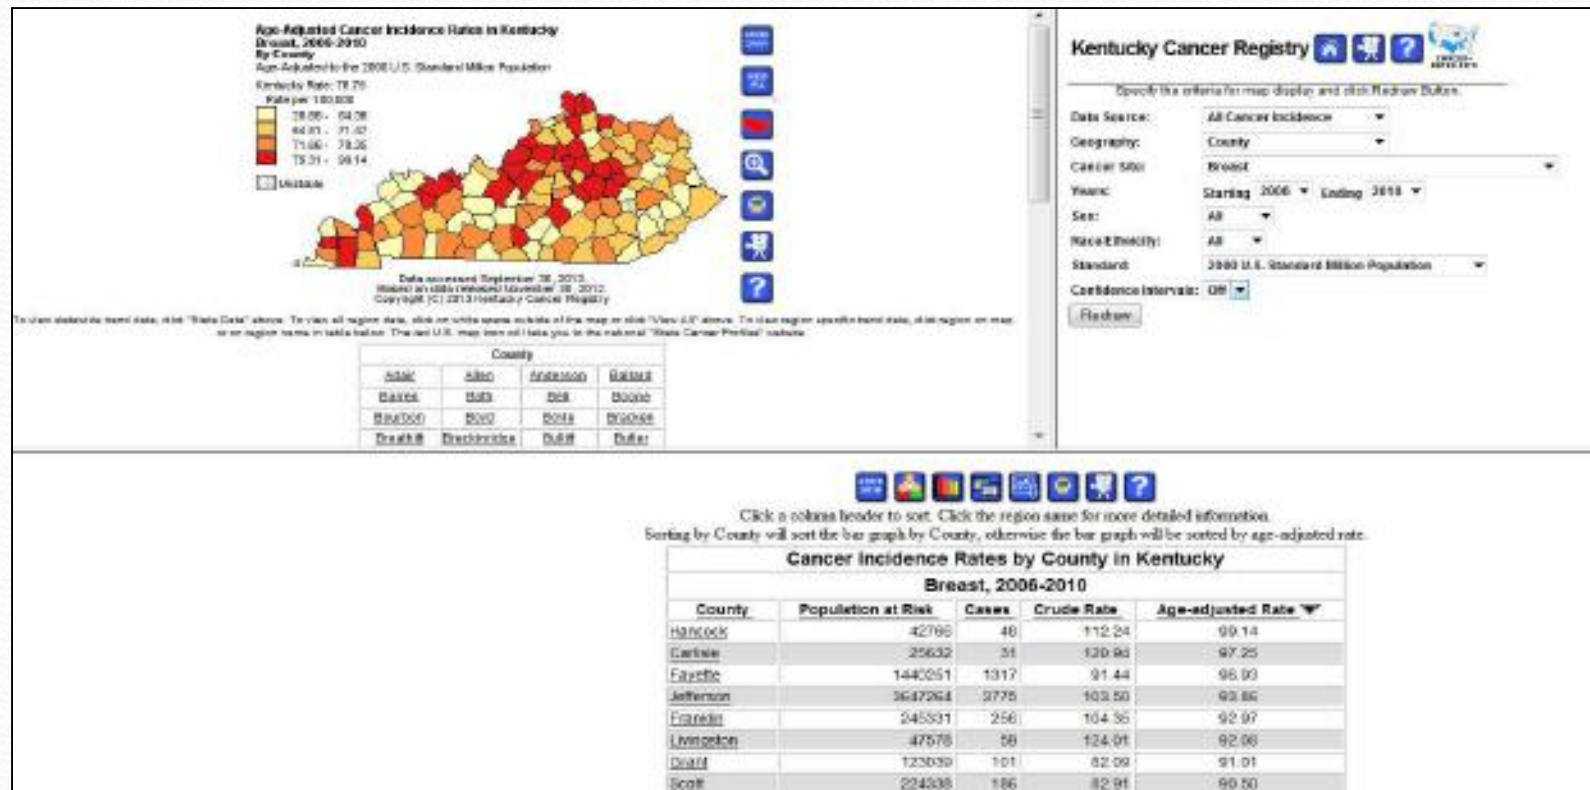

In 1990, the State General Assembly passed legislation that formally established The Kentucky Cancer Registry (KCR) as the official population-based central cancer registry for the Commonwealth of Kentucky. KCR is currently a part of both the National Cancer Institute's Surveillance Epidemiology and End Results (SEER) program and the Centers for Disease Control and Prevention's National Program of Cancer Registries (NPCR). KCR is an active participant in the North American Association of Central Cancer Registries (NAACCR).
