Take Action! Get Your Child's Flu Vaccine!

It's not too late to prevent flu infection or flu reinfection!

- The flu virus is spreading fast in Kentucky.
- The flu vaccine can protect your child from serious illness and death caused by flu.
- The flu vaccine for this year is well-matched to the flu viruses that are spreading.
- Flu hospitalizations, especially for children less than 5 years old, are very high.

You can protect your child by getting the flu vaccine and COVID-19 vaccine at the same clinic visit!

The flu vaccine is SAFE! Talk to your child's primary care provider to schedule an appointment today!

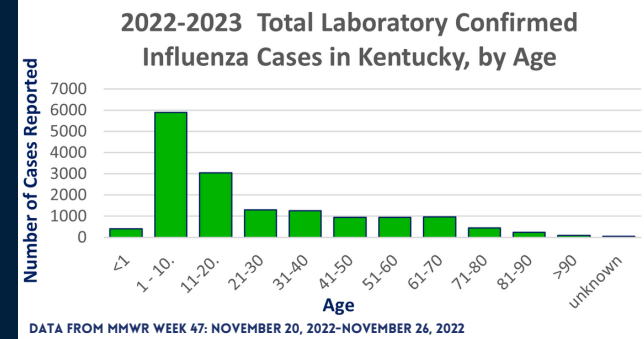

Everyone ages 6 months old and up should get the flu vaccine every year!

Kentucky Public Health
Prevent. Promote. Protect.

Most of the flu cases in Kentucky are in children.

Getting vaccinated is the first step to protect against the flu, but you should teach your child to:

- Wash his/her hands
- Cover coughs & sneezes
- Avoid touching eyes, nose & mouth
