## **Executive Summary**

The Behavioral Risk Factor Surveillance System (BRFSS) is a telephone health survey co-sponsored by the Centers for Disease Control and Prevention (CDC) and the Kentucky Department for Public Health. The survey is randomly administered to non-institutionalized civilian adults 18 years old or older who are living in a household with a telephone. Personal identifying information, such as name or address, is not collected. In Kentucky the BRFSS program is referred to as KyBRFS (Kentucky Behavioral Risk Factor Survey). The following report consists of data collected by the KyBRFS program, and contractor for the calendar year 2020. The objective is to collect uniform, "Kentucky-specific" data on preventive health practices and risk behaviors that are linked to chronic diseases, injuries, and preventable infectious diseases that affect the adult population.

CDC publishes the BRFSS data collected by each state on their website. This website has data at state level but not at sub-state level. In most cases, each state constitutes of single stratum. However, to provide adequate sample sizes for smaller geographically defined populations of interest, some states sample disproportionately from strata defined by sub-state regions. Kentucky collects data normally stratified by fourteen sub-state regions also known as Area Development Districts (ADDs). Changes had to be made in the sample design strata for 2020, since the minimum requirement of 500 respondents in each ADD was not met. A minimum of 500 respondents in a stratum is required to conduct appropriate weighting of the ADD. The strata had to be combined further to create six major sub-state geographic regions instead of fourteen ADDs.

The sub-state level data is not available on the CDC website. The main purpose of this document is to provide data, so it can be used by local health departments for public health transformation and other groups for strategic planning and program management. This data can be used to identify emerging health problems, establish, and track health objectives, and develop and evaluate public health policies and programs. It can also be used to support health-related legislative efforts and assist districts in identifying health needs within their region.

The 2011 KyBRFS data reflects the addition of cellphone only respondents and a change in weighting methodology (raking replaces post-stratification). Due to these significant changes, the 2020 KyBRFS data should only be compared to 2011 - 2019 KyBRFS data. It is not directly comparable to KyBRFS data collected before 2011. Comparing 2020 KyBRFS data with KyBRFS data from years prior to 2011 may cause misinterpretation of trend line shifts in prevalence estimates.

#### Introduction

The Behavioral Risk Factor Surveillance System (BRFSS) is a cross-sectional telephone health survey jointly sponsored by the Centers for Disease Control and Prevention (CDC) and the Kentucky Department for Public Health (KDPH). The survey is randomly administered to non-institutionalized civilian adults aged 18 or older living in a household. Participation in the survey is strictly voluntary. Personal identifying information, such as a person's name or address, is not collected. The BRFSS is a nationwide surveillance tool. In Kentucky, the BRFSS program is referred to as KyBRFS (Kentucky Behavioral Risk Factor Survey) and it has been conducted continuously since 1985.

This document presents a data profile of each sub-state Region based on prevalence data collected from the 2020 KyBRFS. Kentucky has 120 Counties that are divided into six Regions for program planning. Data for this report are analyzed by six Regions. Statewide and nationwide prevalence estimates have been included for comparison.

	Counties included within Each Region
Bluegrass Region	Anderson, Bourbon, Boyle, Clark, Estill, Fayette, Franklin, Garrard, Harrison, Jessamine, Lincoln, Madison, Mercer, Nicholas, Powell, Scott, Woodford.
Central KY Region	Allen, Barren, Butler, Edmonson, Hart, Logan, Metcalfe, Monroe, Simpson, Warren, Breckinridge, Grayson, Hardin, Larue, Marion, Meade, Nelson, Washington, Adair, Casey, Clinton, Cumberland, Green, McCreary, Pulaski, Russell, Taylor, Wayne.
Eastern KY Region	Bath, Bracken, Fleming, Lewis, Mason, Menifee, Montgomery, Morgan, Robertson, Rowan, Boyd, Carter, Elliott, Greenup, Lawrence, Martin, Breathitt, Floyd, Johnson, Magoffin, Pike, Knott, Lee, Leslie, Letcher, Owsley, Perry, Wolfe, Bell, Clay, Harlan, Jackson, Knox, Laurel, Rockcastle, Whitley.
KIPDA Region	Bullitt, Henry, Jefferson, Oldham, Shelby, Spencer, Trimble.
Northern KY Region	Boone, Campbell, Carrol, Gallatin, Grant, Kenton, Owen, Pendleton.
Western KY Region	Ballard, Calloway, Carlisle, Fulton, Graves, Hickman, Lyon, McCracken, Marshall, Caldwell, Christian, Crittenden, Hopkins, Muhlenberg, Todd, Trigg, Daviess, Hancock, Henderson, Livingston, McLean, Ohio, Union, Webster.

# Statewide and Nationwide Prevalence Estimates

<b>U.S. vs. Kentucky</b> (2020)	Nationwide (States and DC)	Kentucky		
	Median %	%	95% CI	
Alcohol Consumption				
Adults who reported heavy drinking	6.7	6.3	5.3 – 7.4	
Adults who reported binge drinking  Arthritis	15.7	14.4	12.9 – 15.9	
Adults who have arthritis	24.5	32.2	30.4 – 34.0
